Defence in Annulment Case Has all Evidence Before Court Anticipated That Prosecution Will Rest Their Case Some Time This Afternoon CAPT. MATTERN STAR WITNESS

The ordeal of Captain LeRoy Mattern, former Government House aide, who was called by Hon. O. L. McPherson to testify that he had maintained adulterous relations with the Minister's former wife ended in the witness box on Friday afternoon, but not before George Van Allen, K.C., cross-examining counsel, had suggested that a portion of his evidence was "a tissue of lies" and charged that he had "formed a habit of sleeping with other men's wives."

Mattern was under cross-examination on his story all day. At the afternoon session, Mr. Van Allen confronted him with numerous contradictions between his own testimony and that of the Minister, Mrs. Helen Mattern (now married to Hon. Mr. McPherson) and other witnesses. He particularly wanted to know how it happened that Capt. Mattern, when he went to the Flanagan Hotel at Saskatoon to keep a rendezvous with Mrs. Cora McPherson, had signed his undisputed signature as "L. R. Mattern and wife, Edmonton," if it was actually a secret, illicit meeting between the pair, and not (as Mrs. McPherson had alleged) for the purpose of supplying "hot evidence" for the McPherson and Mattern divorce.

The witness first stated that he was not intended as an illicit guilty rendezvous. He said he had only gone there to give advice and comfort to Mrs. McPherson who had left home a few days before and was feeling lonely and in need of advice.

"Then why did you register 'and wife'?" he asked. "You didn't have to register Mrs. McPherson as your wife at the hotel if you had only gone there to give her advice in her difficulties," pointed out Mr. Van Allen.

The witness adhered to his position that it was not intended as an adulterous meeting.

"Not after what you said had happened between you in the music room?" demanded counsel.

"I may have thought it a possibility," admitted the witness.

"But why," persisted Mr. Van Allen, "did you not, if this was a secret meeting, register under an assumed name?"

Capt. Mattern seized the opening. In tones of outraged virtue, he replied: "I am not in the habit, Mr. Van Allen, of using other men's names."

"No, but you had formed the habit of sleeping with other men's wives," retorted counsel.

Mr. Justice Ford intervened as the sparks started to fly, and the questioning proceeded on a quieter level, with the witness protesting that his wife, Helen, had no knowledge that he was meeting Mrs. McPherson for the purpose of providing hot evidence though she had previously written to Mrs. Lucie McPherson at Great Falls: "It's settled, they're going."

What was settled? demanded Mr. Van Allen.

"I can't remember," said the witness.

"I suggest it meant that you and Cora had arranged to leave together," declared counsel.

"Not necessarily," argued the witness who admitted that he might have taken part in a conversation with "Tony" and "Helen" at which Mrs. McPherson's intention to leave home was discussed. He qualified his admissions by asserting that he had never agreed to go away with Mrs. McPherson or to marry her or support her, if she did go away.

Capt. Mattern said that Mrs. McPherson had sought his advice as to where to go, suggesting that she might go to Calgary or Great Falls.

"I advised Saskatoon," he said.

Asked to explain his reasons for advising Saskatoon, he said that Mrs. McPherson has friends at Calgary and relations at Great Falls. He feared that if she went to either of these two places, she would not feel lonely, whereas if she went to Saskatoon where she had no friends, she would realize she was really leaving home and speedily return to it and to her husband.

"Coupled with the fact," suggested Mr. Van Allen, "that Saskatoon was on the air run and you could visit her cheaply there."

Capt. Mattern indignantly denied any such sordid motive.

"Why," asked Mr. Van Allen, "if you wanted her to go to Saskatoon so that she would get lonely and want to go back to her husband, did you visit her there? Did you think that would help her to go back to her husband?"

The witness insisted that his in-

tentions in going to Saskatoon had been honorable.

A discrepancy which Mr. Van Allen harried the witness with related to an occasion in the fall of 1930, after the coast trip, when Hon. Mr. McPherson had to go to Ottawa on public business for ten days and during which time Mrs. Mattern stayed at his home.

"Did you consent to your wife going to the McPherson home at that time?" asked counsel.

Capt. Mattern said he had. He explained that his wife was ill at the time, and Mrs. McPherson had persuaded his wife to stay with her. He said that his wife consented rather than her will.

Mr. Van Allen confronted the witness with the version of the incident as narrated by Hon. Mr. McPherson in his examination for discovery which reads: "She (Mrs. McPherson) told me that she would not be there when I came back, so I asked Mrs. Mattern to come to the house. That is why I asked Mrs. Mattern to come and stay at the house."

Capt. Mattern suggested that there must have been more than one occasion in 1930 when Hon. Mr. McPherson had gone to Ottawa and his wife had stayed at this McPherson home, and that he and the minister were referring to different occasions.

"I suggest that your last answer is nothing but a tissue of lies," said counsel.

"Nothing of the kind," adhered the witness.

A power which Mr. Van Allen gave the witness came after Capt. Mattern had testified that he had asked for a transfer from Edmonton to Winnipeg because he had wanted to "get away from the unpleasantness of the McPherson trouble."

"Then why did you come back here with your young wife to face this trouble in 1932?" asked the lawyer.

The witness said he had returned because his Winnipeg job had terminated and he had come back to seek insurance from a former pupil recently that he had said and Mrs. McPherson had been "just good friends."

Many of the witnesses' answers had been of the "I don't remember" class, and at the conclusion of his cross-examination, S. R. Woods, K.C., counsel for Hon. Mr. McPherson, examined him to get a definite denial to the question of collusion having been practised with Hon. Mr. McPherson or any other parties in the McPherson and Mattern divorce.

Mattern Poses as a Home Wrecker

Capt. Mattern, who is a prominent figure in the O. L. McPherson divorce annulment case is the star witness for the Hon. Minister of Public Works in the U.F.A. Government.

A crowded courtroom heard Mattern, who now is an insurance salesman, admit his actions with Mrs. McPherson and deny her testimony that their friendship was entirely innocent.

At one point during the afternoon Neil D. McLean, K.C., a counsel for Mrs. McPherson, instructed Mr. Mattern to "Please keep your mouth shut."

Mattern denied that there was any arrangement whereby he was to go to Saskatoon with Mrs. McPherson to provide evidence for a divorce, and denied that they spent one night in a hotel there. He spent two with her, he said.

He is being questioned by Mrs. McPherson's lawyer.

Q: What is your present occupation? A: I am in the life insurance business.

Q: You live in Edmonton? A: Yes.

Q: During 1929 did you meet the plaintiff and the defendant in this action? A: I am not just sure when I met them first, the first time I can recall meeting them in anything that is relevant to the case was some time in 1929 at a dance in the armory.

I danced two or three times with Cora McPherson. I met them again the same fall at a dance in the Macdonald.

Q: After that, did you see more of her? A: Along toward Christmas time, when Cora called Helen and invited us to go to a New Year's ball at the University of Alberta. She arranged invitations for us. Helen said Cora would like us to go with them and to ride home in their car.

As I believed Cora had given the invitation, I danced two or three times with her.

Ottawa To Cut Relief Grants Soon

It is not surprising that provincial and civil authorities in the four western provinces are seriously perturbed by the information from Ottawa that federal relief grants are to be reduced from June 1. The news comes at a time when they were planning to ask the Dominion Government to assume a larger proportion of the cost of unemployed relief. The financial resources of many of the larger western centres have become strained and the long continuance of relief expenditures has been a contributing factor. They are already im-

posed because the same terms are likely to be applied to an addition to relief costs implied by the federal government's intimation that it will reduce its grants.

British Columbia has been notified that the federal contribution to direct relief will be reduced in June to 20 per cent, in July to 10 per cent and then will be discontinued for a time at least. This agreement with British Columbia is of outside interest because the same terms are likely to be applied to the other western provinces. Its main features are:

The Dominion undertakes to bear 100 per cent. of the cost of homeless men (single unemployed) and to provide work camps for them where construction projects can be carried out. The men will be fed, sheltered and clothed and paid 20c. per day.

In addition, the Dominion will accept for these work camps other men in need of relief (other than single unemployed) provided they are nominated by the province and provided the province pays \$5 Dominion 25c. per day for each man.

If it is the desire of the province, the Dominion will take over provincial construction projects provided the province gives the Dominion existing camps and equipment, machinery, etc. The province, in addition, must furnish engineering supervision.

The Dominion agrees to pay 50 per cent. of direct relief up to July 31 in unorganized territory. The Dominion agrees, also, to pay 50 per cent. of direct relief given to transient families.

The clauses dealing with direct relief payments are as follows: The Dominion will pay to the province the following percentages of the necessary expenditures incurred by any municipality for direct relief, for reimbursement to the municipality: April 1 to May 31, 33 1-3 per cent.; June 1 to June 30, 20 per cent.; July 1 to July 31, 10 per cent. Provided the Dominion may, by reason of the financial condition of any municipality, assume a greater percentage of the municipality for direct relief during any of these periods, but in no case shall the Dominion contribute in respect of such expenditures for direct relief an amount in excess of that contributed by the province.

It would seem that Ottawa believes there will be an early and decided improvement in employment conditions, but in the event, familiar with the statistics of the unemployment problem, no such optimism can be entertained. The placing of the many thousands of men now on relief back into self-supporting employment will be a slow and difficult task.

OTTAWA: The transfer of Brigadier General J. M. Ross, C.M.G., D.S.O. from the position of officer commanding military district No. 12 at Regina, to the appointment of G.O.C. No. 1 military district at London, Ont., is announced by the department of national defence.

VANCOUVER: William Henry Gordon Cooke walked into Vancouver Thursday from Haida but he is going to ride back. He is planning to ride back on a bicycle in a trans-Canada bicycle race from Vancouver to Montreal in August.

OTTAWA: Car loadings on Canadian railways declined by 956 for the week ending May 13, compared with the previous week and by 7,324 for the corresponding week a year ago, according to the weekly return issued Friday by the Dominion bureau of statistics.

AIRDRIE, Alta. C. Bohay, 30-year-old farmer of the Airdrie district about 6 miles north of Calgary, was found dead Friday in the basement of his home, a bullet wound in the head and a rifle lying beside the body. Bohay who had been in ill health, leaves a wife and three children.

MOVING PICTURES AT BAPTIST CHURCH

Under the auspices of the Young People's Society of the Lacombe Baptist Church a very special feature will take place Saturday evening, May 27th at 8 o'clock when the C.P.R. moving picture covering England and Scotland, scenes of which remain to be shown to us under the direction of Robert Watson, F.R.G.S. These will cover a space of one and one-half hours and will be profitable to all who come. Special music also being provided. We are very grateful that this opportunity has been given to the people of Lacombe and District, and we anticipate a large audience to view these scenes.

A silver collection will be taken at the door in aid of the Society funds.

World Co-operation In Prospect

Events of the past few weeks have concentrated attention on the interdependence of the nations of the world, and, by their promise of a general attack on a world scale upon the major problems of the hour, have injected new hope in suffering humanity that at last a serious effort is being made to cure the ills which have prostrated the world economic system. Conversations of leading statesmen at Washington, definite assurance that the world economic conference will be held in London next month, the prospect that solution will be found in reciprocal tariff arrangements and adoption of an international monetary unit, have had immediate beneficial effect in the markets of the world, and appear to have restored some of the confidence lost in the crash of 1929 and the bitter years since.

Canada, in particular, faces the task of committing its new crop to the fertile soil with a renewed optimism and a higher courage. Assurance from Washington and Ottawa of reciprocal agreements in the offing that will tend to reopen channels of trade long made barren and unproductive by prohibitive tariff barriers, have produced a most welcome reaction in the Prairie West. Conjoined with this looms possibility of an easing of the general trade situation in Continental Europe where Canadian wheat has found continually increasing obstacles to overcome—obstacles created by local fears and narrow prejudices.

The movement toward world co-operation bears with it also the harbinger of such conditions as will make effectively beneficial the Empire trade agreements consummated at Ottawa, last year. With these auspicious circumstances encouraging him, no wonder the Prairie Farmer sows higher hopes with his seed this year!

The idea that an international problem can only be tackled successfully in an international way, was long in penetrating the minds of many world statesmen. This may have been due to the fact that statesmen are proverbially hesitant of moving in advance of public opinion—and it is a fact that public opinion, since the war, nurtured on fears and despondencies, has been notoriously nationalistic in sentiment in virtually every civilized country. In consequence, the nations have sparred defensively to evade disarmament, despite the general abhorrence of war; and have erected tariff barriers in the futile hope of developing self-contained national economies, effects the fact that a customs port may be more provocative than a concrete fort. The resultant stimulation of animosities has tended to retard concerted action upon the economic problems; but the strangulation of world trade with its accompaniment of widespread unemployment and suffering, has finally served to awaken general realization of the essential interdependence of nations, and recognition of the fact that the sure path to recovery lies through co-operation. Even France, with all her hoards of gold, has been forced recently to borrow \$150,000,000 from England to buttress the franc, demonstrating that in this day and generation no country is so organized as to be able to live of itself alone.

Generally speaking, therefore, it may be said that the world at last has become internationally-minded; and that is a sign that common sense is asserting itself. In Germany alone would there appear to be a reactionary movement towards a narrower nationalism, but the movement in Germany is capable of a dual interpretation. It may be true that Herr Hitler and his Nazi army have resurrected some of the more subversive characteristics of Prussian "Junkerism" in their so-called "bloodless revolution"; but it is also true that Herr Hitler has evinced a willingness to negotiate with other nations of the world not only in matters of trade and commerce but also in matters of armaments. The new Germany, therefore, while driven along internally in a narrow nationalistic regimentation by men imbued with the "administrative ideals of a sergeant-major" (as Guedella would say), is awake to the necessity of co-operation in the wider field of world politics and trade in the interests of world peace and world prosperity. That is to say, the rigors of the Nazi discipline would appear to be fundamentally protective of the German commonwealth and the peril which it gains rather than aimed at any imaginary peril from without. In any case, the German internal situation does not necessarily impair prospects of a successful solution of the world economic problem, nor weaken hopes of a restoration of normal trade relations among the countries of the world.

Need More Cattle Steamers

Western Brokers Claim Only Six Available For Trade

Neglect of the Dominion Government to subsidize ocean transport to enter the Canadian cattle trade is strongly resented at Winnipeg. Brokers point out that only six tramp steamers are available to this trade, that two British companies have chartered these boats and that the tramp steamer owners some months ago offered to pay half the cost of fitting up the boats to carry cattle if the Dominion Government would pay the other half.

The Dominion Government was silent on this issue. Today, as a consequence, the Canadian cattle export trade is limited only by the capacity of these steamers to carry cattle. They are scheduled to carry 450 each every three weeks to Britain all summer which will mean that a maximum for the year of 45,000 will be exported.

Canada could easily export 100,000 head it is claimed. The cost of fitting a boat is about \$12 per head of cattle capacity. A boat big enough to take 500 head would cost \$6,000. A boat to carry 300 head would cost \$4,500.

Diamonds (no larger than one-twentieth of a carat so far) have been manufactured at Columbia University at a cost of approximately \$5 a carat.

There are 41,029 more women than men in Hampshire, England, and the Isle of Wight.

The Netherlands may restrict printed areas for agriculture.

Nervous—Could Not Sleep Tired Out All The Time

Mrs. George Berlioz, Nauwagauk, N.B., writes:—"I was so very nervous I could not sleep at night, and felt tired out all the time."

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I procured two boxes and they proved of wonderful help to me.

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Winnipeg, Ont.

House Had Gold Ceiling

Residence of Former Chicago Bank Director Sold By Auction

The famous house with the 14-carat gold-ceilinged smoking room, lined with morocco leather—a house so luxuriously furnished it would have done credit to a fabulously wealthy Indian Maharajah—has gone on the auction block at Chicago.

It was the home of Frank A. Mulholland, real estate operator and a former director in the chain of twelve defunct Bain banks, who was indicted with other officials of the financial institutions.

The house, situated in exclusive Beverly Hills, was one of the show places of the section.

The building contains eleven rooms and sold along with it were the costly furnishings which included a beautiful hand-carved antique dining room suite of walnut, and French walnut love seats.

HAS LOST FAT FOR THREE YEARS

68 lbs. Gone Altogether

A woman writes:—"For nearly three years I have been taking Kruschen Salts every morning in hot water and have lost 68 lbs. of fat. My weight before taking them was 196 lbs. and it is now 128 lbs. Compare the difference—it is marvellous. My mother and sister are also taking Kruschen and lots of our friends are taking them. As regards diet, it is not necessary to do one little bit of dieting; in my case I have never denied myself anything since I started taking Kruschen Salts. I walk every day, and do not eat many potatoes or much sugar. I don't think I shall ever be grateful enough to Kruschen Salts for the great help they have been to me, and shall never stop taking them, or recommending them to people I think need them." (Miss) K. T.

Taken every morning, Kruschen effects a perfectly natural clearance of undigested food substances and all excessive watery matter. Unless this wastage is regularly expelled, Nature will eventually store it up out of the way in the form of ugly fat.

The Oldest Industry

Manufacture Of Leather Dates Back To Ancient Egypt

Leather manufacture is the oldest industry in the world, according to Dr. D. Burton, chemist of a leather firm in Bolton, Lancashire, England, in an address at the annual meeting of the Chemical and Philosophical Society at Manchester. His subject was "The Art and Science of Leather Manufacture."

He gave an historical sketch in which he described the industry as the oldest in the world, and mentioned the fine work which still survives from the Egypt of 3600 B.C., and from ancient China. He emphasized the importance of grain preservation and dealt with the various causes of deterioration, such as the warble fly and anthrax. The material for the soles of footwear, he said, leather had the peculiar advantage of being impervious to water, but not to air. A leather sole thus "allowed the foot to breathe."

Loan Will Be Repaid

Western Canada Will Return Money To Federal Government In Due Course

The agricultural west as a whole has had unusual difficulties to face as a consequence of the heavy drop in the prices of farm products and the large payments that its Governments have had to make on their indebtedness because of adverse exchange. The federal authorities acted in the best interests of the whole Dominion in tending assistance under the extraordinary circumstances. The money being repaid and the policy that the Federal Government has pursued will be justified. The resources of the provinces are such that there can be no doubt about their making the come-back that will assure the meeting of their obligations though it is essential that they realize how far from easy this will be and that without delay they do everything possible towards putting their finances in better shape. —Edmonton Journal.

Grain Show Essay

Plan To Bring Boys and Girls To World's Grain Show At Regina

With the object of bringing 160 boys and girls of school age to see the World's Grain Show, at Regina, in July, Saskatchewan Pulp Elevators Ltd., has announced a special essay contest. The subject of the essay will be "Practical Co-Operation In the Handling and Marketing of Grain." All school children in the province up to and including grade eight, are eligible.

The plan is designed to give the children an opportunity of comparing the wheat grown in Saskatchewan with that of other countries.

Would Be Useful

Perhaps the greatest invention in the automobile shift its own gears when the speed gets up to fifteen miles an hour can go a step further and teach the engine brakes to step in when the speedometer is flirting with seventy.

Meteor Crater, Arizona, is 4,000 feet in diameter and 600 feet deep.

THE JAILED BRITISHER

W. H. MacDonald, British engineer, accused by Soviet authorities of sabotage and espionage, is pictured as he testified on his own behalf during his recent trial with five fellow-countrymen at Moscow. Convicted, MacDonald was sentenced to two years imprisonment. Great Britain protested the verdict by declaring an embargo on Russian goods.

New Device Is Valuable

"Echometer" Enables Ships To Take Soundings Merely By Pressing Button

A device known as the "echometer," manufactured by the Marconi Sounding Device Company, gives the depth of water under a ship and the nature of the bed of the ocean, and will eventually, it is thought, be able to report the presence of particular kinds of fish in the neighborhood of the ship. British trawlers are using this device more than other kinds of vessels at present, it being a comparatively new thing in the marine life.

It is claimed it is a valuable detector and that 50 per cent. of the losses of vessels have hitherto been caused by strandings and kindred causes, many of which might have been obviated by the use of sounding apparatus capable of giving soundings instantaneously and in quick succession.

The device not only gives the depth of water under the ship, but indicates the nature (hard or soft) of the sea bottom, while recent experiments tend to show that the apparatus will eventually give information as to the presence of particular kinds of fish in the neighborhood of the trawler using it.

The apparatus is extremely simple in operation and can be manipulated by any member of the ship's crew. Soundings can be obtained instantaneously merely by pressing a button, and the presence of this gear on board ship undoubtedly encourages the takings of soundings frequently, even during the most adverse weather conditions.—Canadian Press Dispatch.

Raising Revenue

Over \$1,000,000,000 Collected In Income Tax Since 1917

Since Canada adopted the income tax in 1917 as a means of raising revenue for the Federal Exchequer, an average of over \$60,000,000 has been collected each year. In the fiscal year ended March 31, 1933, more than \$62,000,000 was paid in income tax by Canadians.

Since 1917, out of profits and revenues of the people residing and carrying on business in Canada, there has been collected over \$1,000,000,000. As part of this amount has been taken from dividends and interest going abroad. The average cost of collection over these years has been 2.9 per cent. of the amount collected, or in other words less than three cents to collect one dollar.

Patrol Hudson Straits

Government For Breaker To Be Used On Route In Summer Season

The government ice-breaker N. B. McLean will again act as patrol boat and escort to freighters using the Hudson Straits route during the summer season, according to announcement from the Department of Marine. The powerful ice-crusher will go into dry dock here for overhauling, following which she will take on supplies and provisions for her voyage north, which will probably start about the end of June.

Shock Was Too Much

The shock of getting a job after two years of idleness was so much that George T. Tubbs, 56, showmaker and nephew of the late Mollie Dunham, champion fiddler of Maine, collapsed and died.

Take Your Choice

If you suddenly feel a pain at the back of the skull as though somebody had hit you over the head with a mallet, you've got neuritis, declares a doctor. Or somebody has hit you over the head with a mallet.

The part of Shanghai known as the International Settlement, has over a million inhabitants.

Impressed By Visit

British Vice-Admiral Gives Account Of Trip To Canada

Vice-Admiral Francis Wade Caulfield gives a breezy account of a six-week's visit to Canada in his report as president of the association of retired naval officers.

"A small property near Vancouver was recently turned over to me. Affairs connected with this property or settlement (called 'Caulfield' after my father, who bought it as virgin forest and started to develop it at the end of the last century) necessitated a trip through Canada to the Pacific coast, and so, incidentally, gave me the opportunity of meeting A.R.N.O. members of whom, in September, there were 24 scattered between Nova Scotia and Alaska. It was strenuous, but splendid six weeks. The welcome given me everywhere was something not to be forgotten, and I should like to take this opportunity of once again thanking my various hosts and hostesses for their charming hospitality and the truly delightful and extraordinarily interesting time they gave me.

"One member (working on a farm for his approaching university degree) was pitching corn, another was running a ferry, another was perched on top of a sort of 'T' in the forest fire 'look-out' in the forest area of Ontario. A fourth member owned and worked a 20 acre fruit farm. Applaud! Why the branches were breaking with their load, and hardly a tree but carried 5,000, some nearly 5,000 apples; whilst a fifth member, in the Rocky Mountains, and friend and counsellor to the whole of his little community, in fact, his word 'went', and little was done in his district without the knowledge and approval of 'The Commander'.

"Everyone who was dependent on pension or English income was being badly hit, the pound sterling having dropped from \$4.86 to \$3.80 and 'servants' were becoming a luxury. I was amazed, however, to find how comfortable and happy a family can live in a house with servants, but fitted with labor saving appliances, cheap electricity, and a cheerful and efficient housewife.

Support Land Scheme

Regina To Participate In Provincial Election

Decision to participate in the provincial government's back to the land scheme was reached by Regina city council recently, although some criticism was directed to two points in the scheme. Protested points were that the cost per family will be higher this year than last, and the scheme of policy of the government this year compared with that in effect last year.

Under this year's scheme the municipality participating in the plan is required to agree to undertake to provide a site for the scheme, to purchase per family up to \$400 and, further, to assume one-third of an excess expenditure over \$400 but limited to an additional \$200.

Last year the cost to the city per family was \$100 and some aldermen felt those who went under last year's plan would have ground for objection to an advantage given to those going under this year's plan.

Completes Twelve-Year Task

Priest-Artist's Paintings Adorn Walls Of Gravelbourg Hospital

Messrs. Chas. Maillet, priest-artist, has completed twelve years' labor in painting religious pictures adorning the walls of Gravelbourg hospital.

His "Way of the Cross," just finished, consists of fourteen life-size paintings placed around the church proper. They are rich in colors, beautiful and of aesthetic value. In addition to beautiful contrasts of colors, symmetry, order, regularity and balancing of ideas are found in his work. They come from the mind of an artist, who has painted the apologetic, dogmatic and moral doctrine of the Christian faith.

The Explanation

Wife: "Henry, here you are grousing about a few little bills for my hat, stockings, and whatnot. Do you know I could have married M. T. Head, the telephone magnate, and he's a millionaire. But I didn't."

Henry: "Yes, that explains why he's a millionaire."

Another thing that has been demonstrated is that a car going 60 miles an hour will hit a concrete abutment just as hard this year as it did last.

Radio telephone service between trains and ferries has been inaugurated by a railway in Germany.

Soured On The World?—That's The Liver

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and nervous, are actually suffering from a diseased liver. The liver is the largest gland in the body and it is the source of bile, which is necessary for the digestion of food. If the liver is diseased, the bile is not secreted properly, and the food is not digested. This causes a sour taste in the mouth, a feeling of fullness, and a general feeling of ill health.

Dr. J. C. Little Liver Pills will soon get you back to normal. Buy a box today. See it at all drug stores.

Trip To West Indies

Summer Cruises On Fast Cunard Liner Mauretania

Five summer cruises from New York to the West Indies have just been announced for the fast Cunard liner "Mauretania." The duration of each cruise will be 12½ days, the steamer leaving New York on a Saturday and returning Friday two weeks later. It is considered this will make the cruise very suitable for those whose vacations cover only two weeks.

The itinerary for these cruises will be much the same as that covered by the "Mauretania" so successfully this last winter. The ports will include Port of Spain, Trinidad, La Guayra, Venezuela, South America, Willemstad, Curacao, Colon, Panama and Havana, Cuba.

Two nights and one day will be spent in Panama, allowing passengers time to cross the isthmus to the old city of Panama and view the various locks on the way. The same period will be spent also in Havana, with bathing, racing, basketball, golf and jai alai to attract the visitor.

Practically a full daylight day will be spent ashore in each of the other ports.

Cruise sailing dates are July 8th, July 22nd, August 5th, August 22nd, and September 9th.

Commenting on this unusual cruise programme, Arthur Randless, general passenger manager of the Cunard and Anchor-Donaldson Lines in Canada, said: "We have had so many inquiries this year for summer cruises to the West Indies that we have decided to schedule a programme which a few years ago would have been impracticable. Apparently thousands of people who cannot get away in the winter are anxious to visit the places in the West Indies which they have read of and heard so much about, but which up to now have not been accessible in the manner arranged for winter vacationists, that is, by cruises in large Atlantic liners on the all-inclusive basis."

Because of the tremendous number of inquiries received at our offices we decided to look into the question of climate thoroughly. We obviously did not want to send pleasure cruises to the West Indies in summer if there was any doubt as to whether our voyagers would encounter pleasant and comfortable weather.

"To this end we obtained official weather and temperature reports for the entire year at various West Indian ports which the 'Mauretania' touched at this winter. We found that these statistics bore out completely what our agents in these ports had represented, that the variation in temperature between summer and winter was practically negligible.

"During the day the islands are swept by constant trade winds, so that a sultry day, such as we experience in New York is practically unknown. The nights are invariably cool and comfortable.

"Summer seas prevail throughout the entire itinerary practically guaranteeing complete absence of motion, the highly desirable feature of cruising at sea without the discomfort of rough weather.

"The cost of sea cruising was never so economical from the passenger standpoint than it is today. The rate for these cruises is less than what an ordinary summer vacationist spends at home or in a Canadian or American resort."

Not So Good

A farmer's son once decided to be a lawyer. His father drove him into town and got him a job as office boy to a law firm. Three days later the young fellow was back home again.

"Well, Josh, how do you like the law?" his father asked.

"Aw, it ain't what it's cracked up to be," said the boy. "I'm sorry I ever learned it."

New Grain Drying System

A new system of drying, airing and storing grain, which is said to minimize elevator explosions and lessen loss from mildew, has been developed by an engineer in Sweden.

Coyotes have special places to meet and sing their weird songs after nightfall, but they never use the same meeting ground two nights in succession.

Dominion Drama Festival

Masquers Club Of Winnipeg Awarded First Place

The Masquers Club of Winnipeg, winner of the Dominion drama festival competition, with their play "The Man Born To Be Hanged," by Richard Hughes. The Winnipeg club received a marking of 83 per cent. of excellence from Rupert Harvey, festival adjudicator.

To the Masquers' Club will be awarded the Bestuul prize, emblematic of amateur dramatic supremacy in Canada, as well as the special trophy given for the best play in English to be presented during the festival.

As the second best presentation in either English or French Mr. Harvey nominated "Les Rantoux" by Erickmann-Chatrian, which L'Union Dramatique de Quebec Enr. Offered as their entry. This performance received a marking of 80 per cent. of excellence. The Quebec dramatic organization will receive the special trophy awarded for the best play in French, although it is notable that "Les Rantoux" took second position in the whole competition.

The second best English performance during the competition was "Back to Methuselah" by George Bernard Shaw, which the Vancouver Little Theatre Association gave. This presentation received a marking of 79 per cent. from Mr. Harvey. Only Part I. of the first act of this play was presented.

Third in the English plays came "William Shakespeare" by Clemence Dane, presented by the Ottawa Drama League Group B. Its marking was 77 per cent.

In the French plays, "Le Baiser Dans la Nuit," presented by Le Cercle Dramatique des Etudiants de Laval, Quebec, was awarded second position. Its percentage was 66. This play is by Maurice Leval.

The third best performance in French was "Une Affaire d'Or" (last act), by Marcel Gerfaut, which Les Amateurs du Grand Montreal presented. It gained 63 per cent. of excellence.

Fast Northern Trip

Constable Travels From Chesterfield To Churchill In Seven Days

From Chesterfield to Churchill, a distance of 435 miles, in seven days is the accomplishment of Constable Norris Yates. This is the shortest time on record. Constable Yates, accompanied only by an Indian guide, travelled by dog team.

The feat of the young constable was accomplished early in April. The trip to Churchill is only made twice a winter to carry mail and necessities. Constable Yates was an escort to a western Canadian scientific explorer for a month last winter and spent that time completely away from civilization, living the life of an Eskimo.

Will Not Go Hungry

The one crop farmer, who buys all his food at the village grocery and turns his farm into a kind of factory for the production of one staple commodity is especially vulnerable to any depression. The farmer who raises his own food is at least sure that he will never go hungry. And that in times like those through which we have been passing is an assurance worth having. —Quebec Chronicle-Telegraph.

Judge: "Who was driving when you hit that car?"

Drunk (triumphantly): "None of us; we was all on 'ta' back seat."

Federal Government Economies In Reduction Of Expenditures Results In Saving Of \$81,000,000

Reductions in controllable expenditures over the last three years, coupled with the \$14,000,000 provided in the last budget, have resulted in total government economies of \$81,000,000. Hon. E. N. Rhodes, minister of finance, stated in a circular letter forwarded to all Canadian Chambers of Commerce and Boards of Trade which recently called upon the federal administration to "set a good example," in matters of economy.

"The government is in cordial sympathy with the objects you have in mind," Mr. Rhodes wrote. He expressed the opinion that all factors of the problem, in respect to government expenditures, had not been considered.

Even if every salary, pension and parliamentary indemnity were cancelled, there would still be a deficit of \$26,000,000,000 in the non-controllable obligations, he wrote.

"Furthermore," the letter proceeded, "may I point out that for two years past, through action of the treasury board, promotions and increases of pay have been withheld in advance, and as vacancies have occurred in the government service the positions have been abolished. These and other restrictions have resulted in a reduction in the total charge for salaries and wages of \$4,500,000 per annum and a reduction of over 4,000 employees. This is in addition to the saving of \$8,300,000 per annum effected by the 10 per cent. reduction from all salaries and wages."

"In calling for economies, it is erroneously assumed that reductions in controllable expenditures could be made to such an extent as to balance the budget without resort to additional taxation. I submit a few figures in round sums which will indicate the impossibility of such a suggestion. Based upon the taxation measures in force prior to the last budget, estimated revenue for the fiscal year 1933-34 is \$287,000,000, our estimated expenditure for the coming year is \$445,000,000, in which are included the following items of uncontrollable expenditure:

Interest charges, \$133,000,000.
Canadian National Railways deficit, \$55,000,000.
Pensions and soldiers' care, \$58,000,000.

Subsidies to provinces, \$15,000,000.
Old age pensions, \$12,000,000.
Unemployment relief, \$35,000,000.
"These items are fixed and uncontrollable beyond question with the possible exception of that for unemployment relief, but, having regard to existing conditions in Canada and the increasing demands which are made upon the Dominion treasury in this connection, this item can, I think, fairly be included. The total of the above items is \$313,000,000."

"It will thus be observed that if we were in a position to eliminate every dollar of so-called controllable expenditure we would still have a deficit of \$26,000,000. That is to say if we were in a position to dismiss approximately 56,000 permanent civil servants (not including casual employees); stop their superannuation payments in breach of contract; pay no indemnities to members of parliament or to senators; pay no judges' salaries; dismiss penitentiary staffs, the mounted police force, all customs officers, lighthouse keepers, harbor masters, etc. In other words, if the government were to dismiss every civil servant and close all government activities, there would still be a deficit of \$26,000,000."

London Bobby Resourceful

Driven Backwards After Thieves When Turning Around Meant Lost Time

Second to no police organization in the world for getting their man the London police force effected a capture the other day which is no doubt without parallel in police history anywhere.

The "Flying Squad" were cruising around for a stolen car. The suspects spotted the police at the same moment and made their getaway in the traffic. A little later the police were parked by the curb when they saw the stolen car again. There was no time to turn around. But what did the resourceful driver do but start in reverse and drive backwards as fast as he could. He threaded his way ahead of the traffic, overtook the other car and crowded it onto the sidewalk. After that the police had to lay out the thieves in a stand up fight.

Then they got their man. St. Thomas Times-Journal.

Required Nerve

Take off your hat to Lieut-Commander Herbert V. Wiley, late of the ship Akron. The twentieth day after that dirigible crashed found him sailing the skies aboard the new intrepid Macon. That took nerve.

Freddy "What is an iceberg, Daddy?"
Daddy "Why, it's a kind of a permanent wave, son."

Salvage Job Too Costly

Raising Sunk German Fleet Proved Too Great a Problem

The story of the raising of a portion of the German fleet sunk by German crews at Scapa Flow was told to Manchester members of the Institution of Mechanical Engineers by E. F. Cox, head of the salvage firm which undertook the operation.

It cost the firm about £500,000, said Mr. Cox, and they lost money by it. Vessels were sometime upended, and in one instance the divers reported three destroyers in a heap, two lying crosswise over a third. A battleship like the Hindenburg could not be lifted by gear, so they closed up the holes in the vessel and pumped out the water until she floated. One problem was how to locate the valves which the Germans had opened to sink her.

The valves once located, it was no easy job to put on patches. The divers had to search the sides of the vessel thoroughly for holes and had to put on 800 patches. One of the patches cost £2,000. It was not until three days later were they able to bring the Hindenburg to the surface in a stable position without a dangerous list.

Depth Of The Sea

New Deep Sea Sounding Is Made In Pacific Ocean

A new deep in the bed of the Pacific Ocean was reported in a message from the U.S.S. Hamano, Capt. C. B. Mayo, commanding the naval oil tanker, reported that by repeated use of the sonic depth finder, the deep had been measured at 5,501 fathoms, or 33,006 feet, it was found. The message said, at latitude 30.43 north, longitude 142.20 east, which would place it directly across the Pacific Ocean from San Diego near the coast of Japan.

The new sounding approached the greatest known depth, that of 34,210 feet found in the Mindanao trench northeast of the island by that name in the Philippine group.

Daddy "Why, it's a kind of a permanent wave, son."

W. N. U. 1933

Education and Economy

Carrying Saving To The Point Where Essential Education Is Denied

The Seattle Post-Intelligencer reports that in 15 out of the 48 states in the American union, public schools have been closed and no other provision has been made to continue child education.

In 40 states, school terms have been abridged to save money, and thousands of children have been deprived, to the extent of the abridgement of educational opportunities that should be theirs.

In 35 states, the teaching staffs have been reduced to the point where classes are overloaded and can not be taught properly.

In sum, concludes the Post-Intelligencer, the whole public school system of the nation faces an imminent breakdown, the disastrous social and moral effects of which will be felt for a generation. The newspaper concludes by denouncing the "false economy that breeds ignorance, poverty and crime."

All economy in educational affairs is not, of course, false economy. There can and should be true economy, an elimination of extravagance and waste, a pruning away of harmful and unfruitful expenses. But in economies, as in extravagancies, we tend to run to extremes, and there is a real danger, in Vancouver as in the cities and towns across the international boundary, that, in trimming away educational facilities the admitted rights of the rising generation shall be invaded. We are piling up problems enough for that tremendous heritage of debt, which we didn't inherit but created. We must leave them, if we are to be fair, all the facilities possible for solving the problems we are throwing at them. And we are not leaving them all the facilities possible if we give them fewer educational advantages than we can by hook or by crook, provide. Vancouver Province.

Decrease In Fish Sales

Catch In North Greater, But Price Lower Receipts

The value of fresh fish shipped out of the Pas district during the past season was \$33,561, according to the report of E. H. Stevenson, fishing inspector. Last year the amount received by fishermen was \$58,099. The decrease is attributed to the fact that the catch and fish of the population districts are so low in price that northern fish, subject to longer freight hauls, and therefore increased overhead, cannot compete with other markets.

The catch per man this year was greater than last year, but the receipts were less owing to low prices. The total number of pounds shipped this year was 883,700, as against 920,400 last year. There were 138 licenses issued for the season of 1931-32, as against 93 in 1932-33.

A Family Heirloom

Ontario Man Has Jig-Saw Puzzle Made In 1767

A jig-saw puzzle dated 1767 is in possession of G. W. Rayfield, of Orangeville, Ontario. When set up it is a map of England, and is the production of Spilling, engraver, map and print seller, Covent Garden, London, England. Mr. Rayfield said the puzzle has been in the family for generations, and is intact with the exception of five pieces. In his childhood days he and his sister were taught the counties of England by piecing the puzzle parts together. Mr. Rayfield thought the department of education might well consider the advisability of using the jig-saw puzzle idea in connection with geography and other studies.

London had a fog which was practically continuous from November, 1870, to February, 1880. It was the worst period of fog ever recorded there.

When it comes to sport and amusement the depression seems to be scarcely noticeable.

GRAND OLD DUKE REVIEWS BRITISH SAILORS

TENDERS RESIGNATION

Hon. J. R. Cooke, chairman of the Ontario Hydro-Electric Power Commission, who has accepted his resignation, has been elected Premier Henry.

The resignation has not been acted upon.

Uses Of Wood In Canada

A Considerable Proportion Is Still Used For Fuel Purposes

According to figures compiled by the Forest Service, Department of the Interior, the use of wood for fuelwood still continues to be one of the main uses of wood in the Dominion; 30.7 per cent. of the wood cut is consumed in this way. The volume of wood that goes to the sawmill is still greater, by almost one-quarter, constituting 38.2 per cent. of the total quantity of wood cut. Third in importance among the uses of wood, in respect of volume of wood used, comes pulpwood; 24.2 per cent. of the consumption of wood goes for this purpose.

The quantity of wood utilized for railway ties makes a respectable total; 10.2 per cent. of the total quantity of wood cut. Third in importance among the uses of wood, in respect of volume of wood used, comes pulpwood; 24.2 per cent. of the consumption of wood goes for this purpose. The quantity of wood utilized for railway ties makes a respectable total; 10.2 per cent. of the total quantity of wood cut. Third in importance among the uses of wood, in respect of volume of wood used, comes pulpwood; 24.2 per cent. of the consumption of wood goes for this purpose.

Reclaiming Zuyder Zee

Work In Holland Will Take Twenty-Five Years

The work of reclaiming Holland's Zuyder Zee will probably require 25 years. J. P. de Bloos van Kuffeler, director of the project, said recently while in London. The new land will ultimately be used for agricultural purposes he said. It will at first be used for pastoral purposes and later turned into crop-growing land.

Approximately 900 persons already live on the reclaimed land, and approximately one-third of the area is under cultivation. Work will be provided for 3,000 persons when the project is completed, Kuffeler said.

The Zuyder Zee is being enclosed by a dam about 20 miles long. Within the enclosure will be embanked "four parts called polders, from which the sea will be pumped. The main dam already has been completed, and the first polder probably will be finished next year.

Expects To Reach Hundred

Seventy-Eight Year Old Texas Man Thrives On Beans

Thomas Jaime, 78, one-time pony express rider and resident of El Paso, Texas, lives on a diet of friole beans and expects to live to be 100 years old.

"And if I reach that age," he declared, "I'm going to celebrate by riding in an aeroplane. I'd like to see how those pilots carry the mail."

Years ago Jaime rode the express trail from Fort Davis, Texas, to Roswell, New Mexico.

Invented Ice Cream Soda

"The father of the ice cream soda" — Joseph Anton Euper — is dead in Los Angeles at the age of 82. It was back in 1870, when Euper was in the confectionery business in Denison, Texas, that he formulated the drink now known as the ice cream soda.

Making Amazing Progress

Mother Country Laid Sure Foundation For Recovery From Depression

Out of the welter of depression's world-wide ramifications one substantial fact has emerged—Britain is making amazing progress towards recovery. Not a nail from the Old Country but brings good news of trade revival, of the increase in business done in 1932, of steadily dividend rates either maintained or in many cases increased materially. Trade expansion seems to have acquired a genuine momentum.

The March figures are most encouraging. Exports show an increase of \$18,854,300 over those of February and are \$5,555,500 over those of March last year. This, with a heavy reduction in imports amounting to no less than \$23,384,000, has cut down the former adverse balance of trade from \$122,805,000 to \$1,229,200.

Add to this the facts that commodity prices are rising, and that Britain still leads the world in shipbuilding by a tremendous margin; that her steel trade is looking up, after sweeping house cleaning and readjustment of capital; and that both in cottons and in textiles the outlook is improving, and you have a picture which is heartening enough and which, fortunately, is not based upon exaggerated facts, but upon solid reality.

Britain laid the foundation for this recovery by balancing her budget, by cheerfully enduring a tremendous burden of taxation and by refusing to be stampeded into experiments with economic theories. Her example is one that should be studied by all the free nations within the British Commonwealth. We in Canada cannot afford to disregard it.

German Paper Bans Comics

Thinks People Should Not Be Amused During Hard Times

Can great causes smile themselves into success?

This question has been considered at other times in these columns. Now it is provoked again by a Berlin dispatch which says that the Berliner Tageblatt has discontinued its colored comic supplement, explaining: "There is no room in these days of political stress for wit of the traditional form. The new times demand of every one that he take his place in the ranks of national duty."

Germany has a deep tradition of comic supplement, explaining: "There is no room in these days of political stress for wit of the traditional form. The new times demand of every one that he take his place in the ranks of national duty."

Germany has a deep tradition of comic supplement, explaining: "There is no room in these days of political stress for wit of the traditional form. The new times demand of every one that he take his place in the ranks of national duty."

Leads In Homicide Rate

Murder Is Becoming Ingenious Art In United States

"Murder more than ever is becoming an ingenious art, if not a trade, in the United States, Dr. Frederick B. Hoffman, of New York, statistician, concluded, after a survey of 180 American cities. He found the United States led the civilized nations of the world in the homicide rate for 1932.

Memphis, Tenn., had the highest rate of the 180 cities with 54.24 per 100,000 population, but Dr. Hoffman pointed out that the high rate may be due to admission to Memphis hospitals of cases from outside the city.

A score of the cities surveyed had no homicides in 1932. The rate for the United States was 10.5 per 100,000. Dr. Hoffman compared this with 0.5 in England and Wales.

Eight-Year-Old Girl Is Wireless Operator

Receives License In Baltimore With Rating Of 80 Per Cent.

An 8-year-old girl who sat on a thick dictionary so she could comfortably reach the table top, passed the U.S. federal examinations and was licensed a wireless operator. The girl, Jean Hudson of Laurel, Delaware, was given a rating of 80 per cent. by Examiner George E. Sterling at federal radio headquarters at Fort McHenry. She is believed to be the youngest licensed operator in the United States. Jean gets her radio ability naturally. Her father, Elmer L. Hudson, is a licensed amateur operator, and her 14-year-old brother, Roland, received his license a year ago.

Part Agriculture Plays

Agriculture provides roughly one-half of Canada's national export trade, the most important items being grain and grain products, cheese, live stock and live stock products (principally meat and hides), potatoes and apples.

Flour Milling In Canada

The most important manufacturing industry connected with field crops in Canada is flour milling, which dates back to the settlement at Port Royal (now Annapolis, N.S.) in 1600.

Spring Migration Of Birds From The South Heralding Return Of Warmer Weather

Just Human Nature

Jig-Saw Puzzles Give People Chance To Fumble

Jig-saw puzzle addicts are "fumble" in the opinion of Dr. Thaddeus L. Bolton, head of the department of psychology at Temple University, Philadelphia.

But they may be consoled, for most of the great men and women in history have been "fumble." The solutions to some of the greatest world problems were found by "fumbling," Dr. Bolton said.

"The jig-saw puzzle," he said, "is just a device that calls out in great vigor the process of fumbling in random. The jig-saw puzzle addict is a person with more than ordinary, even if temporary, disposition to fumble around and take chances until some chance reveals a step."

"The craze for the puzzle is a response to the disposition in human nature, the making of fumbling is a most useful and diverting attraction. One-half of the world is held in bondage to the fascination of looking for chances. The jig-saw puzzle exercises both hand fumbling and idea fumbling, with emphasis on the fumbling of hands."

"Men are by nature persistent fumble. Variation is the method of evolution. It is the critical moment in invention and discovery. Inventors are great fumble. The claim that they reason things out is not well-founded. "Fuzzing is a problem-solving process. It is a slow, steady, and persistent. Those who prove to be the greatest problem solvers hold the high places."

Work Speeded Up

Assembly Of Royal Scott's Engine Was Ahead Of Schedule

Although the gigantic railway works at Crewe, England, are much larger than those of the Angus Shops in Montreal, the British railwaymen who came with the Royal Scott found no cause to complain of lack of equipment. Indeed the assembly of the British flyer's engine went much faster than anticipated, and the boiler was placed on the chassis of the locomotive nearly 20 hours sooner than was shown on the schedule drawn up with railway system exactitude to govern the preparation of the train for exhibition in Montreal and in Chicago later.

Canadian workmen quickly adapted themselves to the novel condition of handling a train which could almost go inside the Canadian model. They have adopted Fitter Woods of the L. M. & S. into their brotherhood.

New to Canadians is the plan of running two separate sets of coaches on a train de luxe, first and third, and both are sumptuous.

Alberta Issues Tourist Book

Shows Beauty and Grandeur Of Famous Holiday Resorts

"Masterpieces of Nature" is the title of a new booklet of photographic reproductions of bits of grandeur in Alberta, issued by the publicity commissioner of the Alberta Government, Colin G. Croft.

There are 15 plates of scenic Alberta in the booklet, bound in an attractive cover of black and gold.

"The enchantment of Waterton lakes, the beauty of Banff National Park and the grandeur of Jasper, and a few words about the province itself are shown. The booklet, it states, "may serve to indicate to those of the outside world something of the beauty and the grandeur for which Alberta's holiday resorts are justly famous."

The black and gold color scheme is carried through the booklet, in borders around the photographs. It was printed by the Alberta King's Printer, W. D. McLean.

Spring Migration Of Birds

From The South Heralding Return Of Warmer Weather

Of all the myriad voices with which Spring speaks to mankind none is more generally beloved or more widely recognized than the return of the birds. Among our warblers the most conspicuous is undoubtedly the Canada goose or "honker." Travelling by day and by night over towns as well as country in wedge-shaped flocks led by birds of ripe experience these birds of the wild are strikingly emblematic of spring. A few Canada geese winter in the southern coastal parts of the Dominion such as southern Nova Scotia and south-western British Columbia but most of them spend the winter in some part of the United States. There are large wintering grounds on the coast of the Chukchi Sea, the Gulf of Mexico, and in California. From these areas the geese begin to move northward in February. They do not hurry on their way but pause at various suitable places in the set- tled regions of Canada in March and April and await the breaking of the icy bonds of the more northerly waters along which they will nest.

In both Canada and the United States these splendid birds, as well as all other waterfowl, perform their spring migration in peace and safety from shooting because of the protection that is afforded at that time. The year by a treaty between the two countries known as the Migratory Birds Convention, the administration of which in Canada is a joint responsibility of the Department of the Interior and the Department of the Police. Even though the guns are silenced in the spring, the birds have a host of natural difficulties and dangers to meet, such as storms, food scarcity, and drought.

Of course the Canada geese are by no means alone as the feathered hangers of spring. They are eagerly forward to reclaim the land as it is freed from retreating winter are a great host of other birds, both waterfowl, such as ducks and gulls, and song birds or insect-eaters of a great variety. One of the earliest and most familiar of the song birds is the robin, in whose joyous carol is sounded from the top of some leafless maple long before the ice and snow have left us. Other early arrivals among land birds are the crow, the various kinds of blackbirds, and the humble sparrow, whose chirping and song is undoubtedly most appreciated in early spring before it is drowned in the chorus of more gifted voices that arrive later.

Although the birds that lead the way are most eagerly welcomed as heralds of spring, yet the fact that the northward migration of birds in southern Canada continues to grow like a swelling tide through the month of April and does not reach its height until about the middle of May. Typical and conspicuous among these spring arrivals are the swallows commonly known as the circle about overhead in pursuit of their insect prey; the orioles whose gay colours and martial notes bring them to the attention of all; and the bobolinks which fly like madcaps in ecstasy over the green meadows, drenching them with their wonderful songs. Birds such as these, arriving in Canada when the weather has become more settled, generally return on a rather exact schedule arriving about the same time each year. It is interesting to note that the time of their return has a more direct relation to the state of development of vegetation and of insect life in the region than to the man-made calendar and mankind will never cease to wonder at the instinct that brings the bobolink back north from far-away Brazil at just the right time to avoid April snows and starvation on the one hand and to help prevent an undue increase in the numbers of awakened insects in the grasslands on the other.

Brain Has Many Parts

Most Complicated Machinery Invented Cannot Compare With It

Dr. Crile says the brain consists of approximately 4,000,000,000,000 little dynamos. From the point of view of human control it is a question whether this discovery simplifies things. Manipulation of such a vast million million separate power stations may turn out to be a more complicated job than manipulating one mind or one soul, far from simple though we know this to be.

People are pretty well agreed that humanity is in such a sorry state of affairs because we have been unable to maintain control of the elaborate machines we have invented. But at the machines in the world are a speck beside the agglomeration of machinery in Dr. Crile's picture of the human brain. American scientists are peering production of four years ago had 12,000,000 horse power, and the machine with 4,000,000,000,000 units. New York Times.

White horse leather shoes were in vogue in Italy this spring.

Bananas grow on a tall plant which is really an overgrown herb.

St. Andrew's Choir secured first place in the Church choir competition with a mark of 171, and second place in the small town choir event with a mark of 164.

The last day of the Musical Festival in Edmonton left some of us with the impression that all good things must end so soon that life would not be worth while were it not that memory is potent and the lessons learned remain with us forever. The excitement is over. The winners are congratulating themselves and each other. The less fortunate are consoling themselves that they did their best and received a valuable education.

In music as in other things, it is not the winning of trophies which brings satisfaction to the soul, but the continual striving after perfection. As the Adjudicators have repeatedly said, "Don't think of the marks. They don't count except as a guide. The great thing is the criticism." Mr. Anderson, British adjudicator, hoped the day would not be very far distant when there would be a Musical Festival without marks.

The greatest lesson one can learn is that music is something more than a graceful accomplishment. It is one of the main foundations of life as we know it. Music is Rhythm and Rhythm is Life. The seasons occur and recur in smooth and constant rhythm. Even the feelings of mankind in their ideals and fashions, swing rhythmically like a pendulum from one end to the other like a universal language. Therefore we should endeavor to understand more about it and music is best understood when it is performed.

Hon. Perren Baker, Minister of Education, who awarded the Trophies at the close of the Edmonton District Festival on Saturday, said that he considered it a privilege and pleasure to be present on such an occasion. He said this movement was rapidly spreading. Five new school festivals had been started in the Central Province this year.

What other Towns have done, Lacombe can do, particularly after Lacombe's fine showing in the Edmonton Festival. By running a Festival of its own and inviting competition from all districts from Red Deer to Leduc, Lacombe would show that it is not afraid of letting the world and his wife compete. The material reward should stand on our lofty pedestal and allow all the cup and medal collectors come along and win our valuable silver plate, whilst we turn laziness into a virtue and call it artistic superiority over such material considerations.

The willing horse is invariably worn to death and gets nothing for his pains, but we alter all that in this case, by getting it with our coats off to make Lacombe a really musical town and to show other Towns what can be done by a combination of a little talent and a lot of enthusiasm. It is not so much what we do, but how, when and why we do it that counts.

It is up to all organizations in Lacombe and to all the individuals in those organizations to go in and win. If the motive is good we cannot fail to do well.

THE BULL SALE

The Annual Bull Sale at Lacombe will be held on Thursday next, June 1st. Over one hundred choice animals are listed, comprising Herefords, Red Polled, Aberdeen Angus and Shorthorns, contributed by the leading breeders of the Province.

TOWN NEWS

You will enjoy hearing Mrs. Wellwood, soprano, from Edmonton, at the piano recital Friday evening. The programme will start promptly at 8:15.

A large crowd attended the great celebration at Olive yesterday, and with perfect weather, the entire day was a success. The baseball tournament went over his and was won by Morningglades. The fight and dance were well patronized. The fights resulted as follows: Pat O'Brien won his fight on a KO in the 4th round. Pete Holm and Gordon McGovern battled to a draw. Baden Whitehead defeated Olive Sissons. Denver Kid won from Young Watt. George Davis won from Bob Jones. Young Prizel beat Kid Lewis. A complete story of the tournament will be published next week.

One of Lacombe's choirs won first place at the Edmonton District Festival. Come to the recital Friday evening and encourage more young musicians from Lacombe.

McKenzie Bros. this week purchased a carload of choice Shorthorn calves from John Ellis of Lacombe and a carload of choice "black" calves from Dan Leske, of Bentley. These two carloads of cattle were of the very highest type and reflect a lot of credit on their growers. These cattle were shipped to New Westminster to the Swift Canadian company. Highest market prices were paid for this high class stuff, and shows that it pays to raise the best. The calves averaged over 800 lbs. and were equal to any of the "Red Label" beef shipped from here for the Old Country market.

While it is desirable that the actions of our public men should be open to scrutiny, there will be a feeling of relief among the people of Alberta that the McPherson divorce annulment proceedings have about concluded, and that the sordid details of the investigation have ceased to be front page stuff in the newspapers. One thing our people may be proud of is the fact that all parties concerned had their origin in the United States; Canadians as a rule are "not that way."

For the first time in forty-eight years a reunion of the Johnstone brothers took place in Lacombe this week. The brothers are F. J. Johnstone, well known Lacombe district farmer; Rev. W. H. Johnstone, and A. Johnstone. The brothers spent a very pleasant week talking over the exploits of their younger days. Originally from Ontario, the brothers parted in their youth and have never, until recently, been within visiting distance of each other.

The collection at the piano recital Friday evening will be used to purchase additional hymn books for the Church.

We are selling Linoleum and Congoleum Rugs at less than mail order prices. Every pattern and size made, at Lacombe Furniture Store.

Owing to the delay in seeding operations, the Feeders' Day, advertised for May 31st, has been postponed until June 15.

Just arrived at Lacombe Furniture Store a large shipment of stone crocks from 1/2 gallon size to 15 gallon. Also stone churns.

Freddie Fisher, who escaped from Red Deer jail a week ago is still at large.

Furniture was never so low in our time and probably will not remain so very long. We are selling dressers with plate mirror as low as \$13.50. At Lacombe Furniture Store.

Yes, they're just as smart, sporty and cleverly trimmed as any you will see at \$10.00 or more. The dresses are in one and two-piece styles and bright, contrasting colors. The suits are three-piece with lacy pullovers, belted coat and smart skirts. Sizes 14 to 38.

Men's Felt Hats \$2.00 to \$3.50

Young men's styles in light grey and fawn. Men's shapes in fedoras and snap brims. They're silk lined. Sizes 6 1/2 to 7 1/2.

Boy's Tweed Caps 39c.

Clearing the balance of our boy's caps. 6 to 6 3/4.

Men's Tweed Caps Bargain Priced \$1.00

Clearing odd lines of wool tweed caps that were formerly priced at \$1.35 to \$1.75. All sizes 6 1/2 to 7 1/4 in. lot.

Misses' Spring Suits of Wool Tweeds \$5.95

Just six to sell at this unheard of price. A price that scarcely pays for the making. They are mannishly tailored in single and double-breasted styles, in grey mixed wool tweeds. Sizes 10 to 20.

Women's Summer Hats \$1.95, \$2.25, \$2.95

Sporty felts, stitched crepes, Milans and other fine braids. The newest shapes are here.

Women's Jacket Dresses \$12.50 and \$14.50

Advance styles for women, in these smart new frocks, just out of their wrappings. They are made of Georgette with small embroidered rings, or of plain crepes with white or light colored waists and becoming high length jackets. Sizes 18 1/2 to 42.

Women's Spring and Summer Coats Smart New Styles, Dependable Quality, Greater Value \$7.50, \$8.95 to \$12.50

Styles that are right up-to-date. Flocked tweeds; wool Crepes and Polo Cloth. They show many of the popular style features, as larger sleeves. Capes with fur or Satin trim. Collarless and military front effects. Sizes 14 to 40.

Newest Crepe Blouses \$1.95

Fashioned in the season's newest styles, with short sleeves, new neck lines, bows and tucks. Colors blue, pink, Eggshell and white. Sizes 32 to 40.

Dainty Voiles for Summer Frocks Yard 45c.

Flower patterned on lovely sheer Chiffon voiles. They are fast colors to insure satisfactory washing.

Chatelaine Patterns

All Patterns at one price each 15c.

Men's Dress Shirts of English Broadcloth \$1.50

Brand new summer styles; showing stripes, in blue, green and fawn over white. Sizes 14 1/2 to 16 1/2.

Men's Golf Hose \$1.00

All wool hose, Caldwell knit, of soft fawn yarn. Plain fawn cuffs.

Men's Golf Shoes \$4.95

High grade Oxfords. The uppers of fawn and brown calf leather and no-slip Goodyear welted soles. Sizes 6 1/2 to 10.

Young Men's Gray Flannel Pants \$3.50

Popular summer trousers, tailored of grey wool flannel. They have belt loops and two dome fasteners in front. 22 inch bottoms and finished with 2 inch cuffs.

Men's Hyde Park Suits \$24.00

Smartly tailored clothes that fit becomingly and comfortably. Men and young men. Tailored from fine quality English worsteds. Sizes 36 to 44.

Men's Black Work Shoes \$2.75

Shoes of extra value and more comfort. The uppers of soft E.K. finished leather, with soft toes. Solid leather inner and out soles. Sizes 6 to 10.

Girl's Tweed Coats at a Clearing Price \$3.50

Serviceable grey and fawn mixed tweeds for girls of five to twelve years. Full length linings.

Girl's Sport Shoes \$1.75

Now's the time to buy Sports shoes. Made of two-tone fawn and brown leather uppers and composition no-slip soles. Size 11 to 2.

Girl's Patent Strap Slippers \$1.50

The uppers of patent leather and the soles of composition rubber; wide, comfortable fitting. Sizes 11 to 2.

Boy's Golf Hose 35c.

Sturdy cotton hose in grey, fawn and brown, with roll tops, in darker colors. Sizes in the lot 7 1/2 to 9 1/2.

Grocery Department

Brome Grass, No. 1, Couch free, lb. 10c.
Lawn Grass Seed, Kentucky Blue Grass and Dutch Clover Rhubarb, 6 lbs. for 25c.
Loganberry Jam 40c.
Florida Grape Fruit, each 10c.
Apples, Winesaps, 5 lbs. 25c.
English Breakfast Tea, A fine Orange Pekoe, lb. 65c.
Cucumbers, each 15c.

WORLD HAPPENINGS
BRIEFLY TOLD

In a fine state of preservation a 70-year-old note of the private life of Prince Albert, North West Territories, has been found there.

People live to a ripe old age in Victoria. Out of 245 persons buried in Ross Bay Cemetery last year there were 50 more than 80 years of age. Nearly 50 per cent. had reached 70.

Germany has proposed to the world disarmament conference that the British arms plant be amended to provide a maximum calibre of 105 millimetres for mobile guns and to abolish all tanks.

F. J. Burd of the Vancouver Daily Province and a director of the Canadian Press, was re-elected director of the American Newspaper Publishers' Association at the close of the 47th annual convention in New York.

Doukhor children to the number of 154, who have been held almost a year in various public institutions at the coast, have been returned to their relatives in the Doukhor settlements at Nelson.

Pointing out the railway line has been into Churchill for more than four years, a delegation at The Pas is urging the Manitoba Government to complete a hotel this summer for the accommodation of the travelling public.

The last train that will ever run over the abandoned Canadian Pacific line at Mono Road, Ontario, killed A. Stewart, Toronto, and injured Frank Sandell, whose car was struck by a work train proceeding to tear up the line.

One million trees—mostly spruces and pines—will be planted in Vancouver district by the unemployed men to be stationed there by the Dominion Government this summer. They will be furnished by the Quebec Government.

Reduction in the board and residence fees of Royal Victoria College, women's section of McGill University, was announced. The fees will be reduced from \$500 to \$450 and the new scale will go into effect at the opening of the next term.

The number of persons in Canada who are receiving direct relief is placed at "over 1,600,000" by Miss Charlotte Whitton, executive director of the Canadian council on child and family welfare, in her report. The monthly cost of this relief Miss Whitton places at approximately \$6,000,000.

Popularity of Air Travel

Bookings from London to Paris are increasing daily.

Before the air liner "City of Liverpool" crashed in flames the number of people flying to France by the Imperial Airways was about 90 a day.

Now, after the crash, more than 150 people are travelling to Paris by air every day—and the bookings are still rising.

The bookings for Easter were the largest ever known. Every aeroplane had been duplicated, yet there were no more seats on the ordinary routes for Easter.

More aeroplanes are being added to the service to cope with the surprisingly heavy demand for seats.

"This is by far the greatest demand for air liner seats that we have ever experienced," an Imperial Airways official said to a newspaper representative recently.

Children Uprooted Trees

Jealous Because They Were Left Out Of Arbor Day Ceremony

Jealous children who were not chosen to assist in an Arbor Day ceremony took their revenge at Ladysmith, South Africa. The town fathers and leading citizens assembled on the sports ground and entertained a number of school children. Lectures on trees were delivered and after the speechmaking the children were entertained by music and refreshments. The mayor and magistrates then each planted a tree, assisted by certain children. Next morning the trees were found uprooted and stripped of their foliage.

Will Visit Grain Show

The Governor-General and Lady Bessborough will be visitors to Regina during the World's Grain Exhibition and conference, it was learned unofficially recently. Word from an authoritative quarter has been received by those in charge of the exhibition stating that their excellencies, on their forthcoming tour plan to spend a day or two in Regina at the time of the exhibition.

Aircraft In Demand

There is practically no depression in Edgware, Middlesex, England. British civil aircraft have proved so popular that the Havilland aircraft factory has been forced to work a full shift both night and day. The company's business has increased to per cent. in recent months and deliveries have fallen away behind orders.

So sensitive is nitrogen oxide, one of the world's most "touchy" explosives, that it will go off when tickled with a feather.

Prehistoric Animals
Reproduced Life Size

Experts Taking Awe Inspiring Pets To Chicago Fair

George Messmore and Joseph Damon, of New York City, materializers of nightmares, animators of monstrosities, are about to lead a cavalcade of prehistoric animals to Chicago and the Century of Progress Exposition. There, in a special hemispherical building labeled "The World a Million Years Ago," they'll stable their awe-inspiring pets and then wait hopefully to see whether the gate receipts will justify their half-million-dollar investment.

Take (or at least consider) the giant sloth, for example. Within that steel and paper-mache frame, covered with luminous fur, are a half dozen motors that make the creature's body wave, its mouth open and close in snarling bellow, its eyes roll, its claws close convulsively. At the exposition the sloth will be shown struggling desperately to free himself from an assailant pit as a saber-tooth tiger, at the edge of the arena, springs at him. Just such a primitive drama must have been enacted eons ago, for the skeletons of the sloth and the tiger were found in La Brea Pit in California.

The mammoth is made to move realistically by 15 motors, is covered with hides of 420 Mongolian goats, and required a year to build. Roy Chapman Andrews, and the other experts of the American Museum of Natural History have been in consultation with Damon and Messmore, figuring out how this and other prehistoric monsters must have looked and moved.

Twenty-four years ago George Messmore, originally from Detroit, was a back-stage mechanic at the Metropolitan Opera House. Joseph Damon had worked in a St. Louis butcher shop while he studied art, and finally had won a New York scholarship. Here the pair met, and stumbled on a commission to build an elk for a fraternal convention. They gave them the big idea, and they went into business together. Damon knew anatomy, and was a deft sculptor. Messmore, in turn, knew how to give the models life-like motion.

Since then they have created almost every sort of exhibit, from huge models of insects to whole herds of prehistoric animals. Department stores all over the country rent their Santa Claus and reindeer. Theatres and movie companies order gorillas, dinosaurs that will pick up young ladies in their mouths, stage elephants and such.

The world's fair show was the product of a hunch that museums would be a lot more interesting if the stuffed animals were equipped with motion and sound.

Better To Understand

International Point Of View Would Help All Countries

"It is easy to condemn—it is better to understand," Dr. M. E. T. Addison, in telling members of the Toronto Zonta Club of her recent visit to the East, spoke with deep feeling of the great need for the cultivation of an international understanding—an international point of view. She spoke chiefly on Japan, where she spent some time recently.

"We don't understand the needs of other countries—what is going on in lands other than our own," she said. Dr. Addison brought the women of Japan close to the Canadian women in her sympathetic audience, who learned with amazement that only since 1922 have Japanese women been permitted to attend political meetings. Dr. Addison said they were working hard to obtain the suffrage, but were still without it.

Pretty Well Behaved

Canada Has Few Convicts In Proportion To Population

The census of 1921 showed that there were 10,374,786 people in Canada. Of these 8,069,258 were natives of the Dominion. England contributes 723,864, Scotland, 279,702, Ireland 107,548, and Wales 22,348. The remaining 1,222,698, plus 71 born at sea, were foreigners. Last year there were 4,164 convicts incarcerated in our jails. Of these 2,806 were natives of Canada, 309 English or Welsh, 113 Scots, 40 Irish, and the remainder foreign, which included 307 citizens of the United States. The Irish seem to have about the cleanest record in proportion to population, but taken altogether, the people in this country appear to be a pretty well-behaved lot. *Stratford Beacon-Herald.*

They Do It Right

Two cavalry officers were invited to judge a show of coster's dunkies. During the course of the afternoon they overheard some lurid and picturesque language from the entrants, and at last when they were on their way home, one said: "Well, Bill, it's a long time since I heard such real full-blooded cussing as we did this afternoon."

"That's true," commented the other. "I haven't heard anything like it since I left the Holy Land!"

Covent Garden Theatre, London, England, is the third to occupy the site, the first having been opened on December 7th, 1732.

Banks In Three Countries

U.S. Operates Under Many Laws, England and Canada Only One

A correspondent has asked the Transcript: a question which thousands of people are asking: "Why do we never hear of banks closing their doors in England or Canada, no matter how hard the times?" An historian might favor his answer with humor: "It is because the United States, the most progressive nation on earth, is in this regard about one hundred years behind the procession." While Great Britain has merged her whole commercial banking system into five very strong institutions—Barclays, Lloyds, Provincial, Midland and Westminster—operating throughout the kingdom under but one law and plan of regulation, the United States has thousands and thousands of banks, most of them small units, operating under forty-nine different sets of laws and forty-nine different regulatory authorities, excellent in some states, as in Massachusetts, but varying from weak to miserable in many others.—*Boston Transcript.*

Win Strathcona Fellowships

Award To Three Canadians Announced By Yale University

Award of five Strathcona fellowships for the investigation of transportation problems has been announced by Yale University, three of the fellowships being awarded to Canadians.

The recipients are Robert A. Emerson, Morden, Man.; S. Milne Gossage, Montreal; Palmer E. Savage, Montreal; Thomas M. C. Martin, Warsaw, Wis.; and Lyle R. Shellenbarger, Hopkins, Minn.

Strathcona fellowships were made possible by the bequest of Lord Strathcona, identified with the pioneer days of railroading in Canada. All five successful candidates have had previous railroad experience, two of them being third generation railroad men.

No Coffee From Java

Country Not Mentioned In Import Statement For Two Years

In the House of Commons the other day a member remarked that the name of Java suggested to him nothing but coffee. Even that connection appears to be obsolete. A statement of coffee imports into Canada in the past two years lists 18 countries of origin, with Jamaica, Brazil, Colombia and British East Africa leading in quantity, but the Dutch East Indies are not included.

Winnipeg Newspaper Union

Those who go down to the sea in ships on business or pleasure bent think little of the governmental precautions which protect their journeys.

Yet in order that passengers on ocean liners may sleep sound of nights at sea is cruising now in the North Atlantic and experts are testing the direction, speed and volume of the Arctic water as it flows out of Davis Strait past Newfoundland.

There is no certainty in calculating the behaviour of icebergs, but only a reasonable degree of probability to be derived from continued observation. It is for this purpose that the Coast Guard cutter "General Greene" and other vessels keep their lonely patrol in the Arctic seas and send their warnings to liners as they race back and forth between America and Europe.—*New York Evening Post.*

Carload Of Prize Seed Wheat

Alberta Champion Wheat To Be Shown In Fields Of Newfoundland

World championship wheat from Alberta will be used to seed fields in Newfoundland this season, as a result of the sale by the Alberta Department of Agriculture of a carload of prize seed wheat from Wembley district, in the Peace River, to the Newfoundland Department of Agriculture. The carload was made up half of Marquis and half of Reward. On four occasions wheat grown by Herman Treble on his farm at Peace River, Alberta, has won the championship prize at the International Grain and Hay Show, Chicago.

After a checkered career of 353 years Archbishop Abbot's school, Guildford, England, has been closed for lack of funds.

Highway freight services in France are increasing.

Good Looking Spring Wear
Copied at a small outlay.
It's slenderizing too with its cross ed bodice and puffed skirt.
Navy blue and white print how so popular this spring, made the original in a soft crinkled crepe silk.
Style No. 685 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, and 44 inches bust.

MUSIC "HEARD" BY THE DEAF

Here is pictured a remarkable experiment recently conducted at a New York school for the deaf, whereby deaf children were enabled to hear. Instead of trying to make the sound penetrate the ears of the sufferers, this device carried mechanical vibrations through the bones of the head. Countess Olga Albani is shown singing into a microphone as the deaf children listen. This was the first time many of the children had ever heard music.

No More Mass Marriages

New Rector Of St. George's In London, England, Does Not Like Idea

Mass marriages, which have for years been a feature of the Easter festival at the Church of St. George-the-Martyr, Borough High Street, are to be held no more.

For years it has been the custom for young Southwark couples to get married at mass at St. George's on South Sunday. Some years there have been as many as ten couples kneeling at the altar at the same time, and one marriage service has married them all. But never again will ten bridegrooms have to take such a place to the ring upon the finger of the right bride, nor, after the ceremony, will ten wives run the risk of being kissed by the wrong husband! St. George's has a new rector who does not like the idea of mass marriages. He is the Rev. E. C. Cook, who was formerly Vicar of All Saints', South Lambeth, and has been at Southwark only a few weeks.

"I am determined to have no more mass weddings at St. George's," Mr. Cook said the other day, "and I don't think the young people are at all sorry. One of the chief reasons why several couples were married together was because it saved time, and I don't think the young people themselves specially desired it. When you have a number of couples being married at the same time it is impossible for them to regard the ceremony as a solemn sacrament."—*Overseas Daily Mail.*

The Iceberg Patrol

Ocean Travelers Think Little Of Precautions Taken For Their Safety

Those who go down to the sea in ships on business or pleasure bent think little of the governmental precautions which protect their journeys. Yet in order that passengers on ocean liners may sleep sound of nights at sea is cruising now in the North Atlantic and experts are testing the direction, speed and volume of the Arctic water as it flows out of Davis Strait past Newfoundland.

There is no certainty in calculating the behaviour of icebergs, but only a reasonable degree of probability to be derived from continued observation. Recipes For This Week

(By Betty Barclay)

PRUNE SOUFFLE

12 large prunes.
3 egg whites.
3 tablespoons powdered sugar.

Boil prunes in enough water to cover for one hour. Beat prunes to a pulp after removing pits. Beat the egg whites until stiff, fold in the sugar and then the prune pulp. Turn into a greased baking dish and bake in a slow oven (250 degrees Fahrenheit) about twenty minutes. Serve at once with cream, soft custard or any desired sauce.

JELLIED SHRIMP SALAD

Shrimps and tomatoes, there's a combination for a salad every one will enjoy. It is easy to make, too.

2 cans tomato soup.
1 small can shrimps.
2 tablespoons gelatin.
1 cup cold water.

1 tablespoon sugar.
Salt and pepper.
Heat the tomato soup. Add the sugar, salt and pepper to taste. Soak gelatin in cold water. Add to hot tomato mixture and stir until thoroughly dissolved. Arrange the shrimps in the bottom of a wet mold. Pour in the tomato mixture and place to become firm. Serve on lettuce with mayonnaise and a garnish of sliced hard-cooked eggs.

King George Fully Recovered

Taking On Obligations For First Time Since 1928

For the first time since he was taken seriously ill in 1928, King George has plunged into the affairs and obligations of kingship with all his old-time enthusiasm.

Leaves, courts, state meetings, theatre attendances, troop inspections and yachting are among the things listed in the royal engagement book for this spring and summer, and this very heavy program is taken as an indication that the King is now restored to his full health and vigor.

Even the watchfulness of the royal physicians has been relaxed and the King was recently seen out without hat or topcoat. His Majesty, it is said, has never cared for the constant medical supervision exercised over him since his illness, and has been only too glad to point to his renewed health as a reason for the relaxation of this attention.

Valuable Picture Destroyed

16th Century Painting By Dutch Artist Is Burned

A 16th century picture of King William III, by a Dutch artist, on show in Ulster's new parliament house, was destroyed recently. Police charged a man and a woman, members of the Protestant league, slashed the painting and threw red paint on it because an ecclesiastical figure in the picture is said to represent a pope.

The man and woman were detained. The picture has been the centre of heated controversy, and the so-called Extreme Protestants have bitterly attacked the Ulster Government for exhibiting it.

Better Than Discard

Soviet Russia will sow 500,000 acres of wheat, rye and rice by plane this spring. If they will confine themselves to this and cease sowing discord in other countries they will also harvest a better reputation.

"M-m-m-m-m" says the man, looking at the bomb. "It's a bomb, and if you should be run over with a tank it won't weigh more than fifteen tons."—*New Chron.* London.

Indian Handicraft

Medium Of Artistic Expression Of Native Canadians Receiving Attention

In these times when the value of handicrafts as a medium of artistic expression and a medium of artistic expression is receiving its due attention, Miss Mabel C. Ringland's article in the April "Canadian Geographical Journal," on Indian handicrafts, is of pertinent interest. The red-skinned peoples who are indigenous to this country are noted for their masterly work of articles of real beauty; many of them, in fact, such as ceremonial belts and armlets, are decorated with designs of historic and enduring significance.

Miss Ringland tells of handicraft among the Ojibwas and the Algonquians, following their arts from the simplest forms of earliest times to the more complex and sophisticated expressions of today. Fifty years ago, in Ojibwa bead-work, the principal design was a characteristic combination of the conventional willow rose and buds with lines and angular figures. This design is very prevalent among the handicraft of Northern Manitoba Cree, who use it on moccasins, vamps, on the gauntlets of gloves, and in panel decorations on skin coats. It is extremely effective, with its many variations and beautiful color blending. Silk and beads are the mediums.

Miss Ringland divides the designs of the Ojibwas, which she discusses, into four classes, all of more or less symbolic value: simple basic forms, geometric designs, floral patterns, and realistic picture figures. The article is entertaining and informative; it would be of interest to know how much of the Indian technique and decorative scheme in handicraft could be applied to such things as quilting, rug-making, tapestry and similar forms of handicraft practised by white people. The Ojibwas, no notes, have adopted the hooked rug as a medium for realistic artistic expression.—*Winnipeg Free Press.*

Changing Editorship

Famous Boys' Own Paper To Have New Head

One of the most famous editorships in the British Empire, that of the Boys' Own Paper, is about to undergo a change. It is only the second change in this position since the paper was founded 54 years ago. Geoffrey Pocklington, who has been editor for the last 11 years, is retiring.

Brought up in a family atmosphere of service to the church and to the army, Mr. Pocklington has been associated with all kinds of movements on behalf of boyish life, for at least 30 years. A general ago the supremacy of the "B.O.P." among papers of its kind was virtually unchallenged, and its following among boys of all ages is still very strong.

How many grey-haired and bald-headed boys of today are grateful to the "B.O.P." for having given them the works of Henry Kingston, Jules Verne, Talbot, Baines, Reed and Ascroft Hope? W. G. Grace, the unsurpassed in cricket, Captain Webb, the first to swim the Channel, and who was drowned in a attempt to swim the Niagara rapids, wrote for the "B.O.P." and Whymper described his exploits on the Matterhorn in the same pages.

Book Only Inch Square

Contains One Hundred Pages Written By Great Astronomer

Turin, Italy, has the record of owning the smallest printed book in the world.

It is less than an inch long and just an inch across.

It is a letter written by Galileo, the great astronomer, to Princess Maria Cristina of Lorraine, containing 100 pages, bound in white leather.

It was printed in Padua not later than 1897.

Scientists Are Puzzled

Cannot Account For Shower Of Blood-Red Rain

A half-pound pour of a blood-red rain at Gardone, Italy, and over Lake Garda has puzzled scientists. When showers of mud and ashes fell over Rome, Naples and the surrounding countryside the day before Director Alessandro Malagrida, of the Venusian observatory, said a heavy wind had caught up ashes from the volcano and carried them over a wide area. Others said the mud may have resulted from winds which picked up sand in Africa which later became mixed with rain. The new downfall, however, caused great perplexity.

Says Rumor Unfounded

"Of course it is not true," said H. Kawamura, Charge d'Affaires of the Japanese Legation at Ottawa, commenting on statements made in the House of Commons by Thomas Reid, Liberal, New Westminster, B.C., to the effect Japanese naval officers in disguise of fishermen had obtained employment in fishing activities to familiarize themselves with Canada's Pacific coast.

Tennis rackets are the favorite diet of an insect, one-quarter of an inch long, which has just invaded England.

And Ogdens's Fine Cut Cigarette Tobacco is one of the things that make life worth while.

Easy to roll? Yes... but there's more than that to be said for this fragrant, mellow cigarette tobacco.

It's cool and smooth—gives a man everything he wants in a cigarette.

Get a package and learn the whole enjoyable "roll your own" story that Ogdens wants to tell you. Use "Chanticleer" papers with it.

OGDEN'S FINE CUT

Your pipe knows Ogdens's Cut Plus

Holding Garden Contest

Undertaking Being Sponsored In Winnipeg By Women's Canadian Club

Designed to develop a spirit of self-help, and giving seed to the competitors, a garden contest for the unemployed of Winnipeg will be staged this summer by the Winnipeg Women's Canadian Club. The city is divided into 12 zones for the contest and prizes will aggregate \$250. Each contest will also receive 12 tons of plants from the committee. Home canning centres will also be established to save the garden products.

Points will be awarded each month for such results as family co-operation, planning, arrangement and maturity; development of growth, when ready for eating; freedom from weeds and apparent yield; appearance, proper thinning and use of thinnings, freedom from insects and disease, care of surplus; straightness of rows, utilization of space, condition of crop and use of products in the home. Cash prizes will be awarded in each district with a grand prize for the city title.

Quebec Town Lowers Taxes

Rigid Economy Has Provided Montreal Suburb With Surplus

Among the Quebec municipalities that have maintained balanced budgets through the difficult years of the current economic depression is the town of Mount Royal, a suburb of Montreal. Mayor T. S. Darling of that municipality is not only in a position this year to announce a balanced budget but also a reduction in the tax rate from twelve to eleven mills.

Revenue for the year is estimated at \$100,838 against estimated expenditure of \$98,995. The estimated surplus and the tax rate reduction have been made possible, Mayor Darling said, through reducing the town's expenditures on non-essentials and keeping maintenance costs to a minimum.

In its 21 years of existence Mount Royal has not wasted much money on election costs. Mayor Darling has been elected by acclamation for 21 consecutive one-year terms.

Awarded Fellowships

Three westerners are among students who have been awarded fellowships for 1934 by the Royal Society of Canada. They are: James Roy Daniels, English literature, British Columbia; George Alan Harcourt, geology, Alberta; George F. G. Stanley, history, Alberta. They are awarded for advanced research in the subjects named and are worth \$1,5

How to get to SLEEP

When you can't sleep, it's because your nerves won't let you. Don't waste time "counting sheep." Don't lose half your needed rest in reading. Take two tablets of Aspirin, drink a glass of water—and go to sleep.

This simple remedy is all that's needed to insure a night's rest. It's all you need to relieve a headache during the day—or to dispose of other pains. Get these Aspirin tablets and you will get immediate relief.

Aspirin dissolves immediately—gets to work without delay. This desirable speed is not dangerous; it does not depress the system. Just be sure you get Aspirin tablets.

ASPIRIN

CHAPTER X.—Continued.

For a moment, groping about to retrieve his blunder, Buzzard knew what to say or do. There had been no mistake; he had seen that incident with his own eyes when he glanced through the window to find where Alan was. He debated whether to draw back from his statement or to plunge ahead and tell the rest of it—Joyce's momentary battle, the shudder that swept her whole body when she put the scarf into the stove, and the quick blinding tears that she dashed away.

He thought: "Better not get any deeper into this. I'd only blunder again. Better back out entirely."

He stammered: "I might have made a mistake. I might—uh—it might have been the wrapping paper. I just merely saw her put—uh—something into—and I jumped to conclusions. Must have been the wrapper. Why would any person want to burn up a gift like that? Let's forget it."

His tones carried no conviction. He realized it himself. Alan disbelieved him; Alan knew Joyce had burned the scarf he gave her.

Cursing himself hotly, Buzzard looked out across the purpling river. He had meant only the best, and he had dealt Alan a savage pitiless blow. After a little time Alan said to him:

"You'd better go up, Buzzard; she may be waiting for us."

"Aren't you going?"

"No—not now; I don't much care. . . . I don't want supper."

Something in his voice warned Buzzard not to urge him. As he turned away, Alan said, in the tones of a man who has made some hard and abiding decision:

"When you've had supper, come back down here; I'll help you with that work; we'll do it now, so we can get away early. I was thinking—for this evening—something else. But that's out now."

At three o'clock the next morning Buzzard lifted the plane out of the Big Alouka. With Alan directing him, he headed due north.

One hundred and thirty miles away, nearly four hundred miles from Port Endurance, a small tribe of Tinnahs lived along the western fringe of the Thial-Azath. They were a timid, skulking, inoffensive band, sheltered in a region where other tribes scorned to live. Dave MacMillan had been their friend and they brought him their furs; and Alan, during his years at Endurance, had sent a protective patrol to them twice a year.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound—That's what hundreds of women say. It steadies the nerves... makes you eat better... sleep better... relieves periodic headache and backache... makes trying days endurable.

If you are not as well as you want to be, give this medicine a chance to help you. It's a bottle from your druggist today.

W. N. U. 1993

Joyce had found out where they were spending this summer, and Alan had a mission with their old headman, Mugwa-Ethnon.

When the timber country began yielding to lakes and semi-muskeg, he got out his glasses and started searching ahead for their camp. At a height of five thousand feet he could sweep a region of more than two hundred thousand acres. The eyes of an eagle, the wings of a bullet-swift curlew, and that big-barreled Browning machine gun—through luck and driving purpose and a faith in his dubious plan, he had smashed through obstacles till now he held the power and heavy odds over those bandits.

The sure knowledge of this was about all that was left to him. His work in the Mounted, his life here in the North, were both gone; and Buzzard's cataclysmic words last evening had showed him that his secret hope toward Joyce had been a fool's hope, a fool's wishful thinking.

How low he must have fallen in her estimation, that she should bury his gift to her! At first it had seemed a little cruel of Joyce to do that. But then he looked at the incident with relentless honesty, and he could not blame her. Once he and she had planned to marry. People had spoken of it; it had been general acceptance, a puff of white, a single puff, burst from the flap-front. Confident the man was alone and the others were gone, Alan decided to take this bandit alive. He needed information about the others, and information about that pack of furs to clear Dave MacMillan.

While Buzzard circled at a safe distance, he tore a page from a memo book and printed a message: "If you shoot again, we'll splatter you and that island into the lake with our machine guns. Stand out in the clear. No weapons on you. Don't try any crooked move after we light."

He wrapped the message around a monkey-wrench and handed it to Buzzard. From wartime practice of dropping "eggs" on ammunition dumps and camouflaged batteries of Krupp 79's east of Verdun, with no aerial sights except two nails and a string along the fuselage, Buzzard was a good judge of speed, altitude and the right split-instant to release. Whirling over the island, a few hundred yards up, he planted the missile with a dozen paces of the flap-front.

As they looked back they saw the man run out to it, read the message, hesitate a moment, and then raise his left arm, waving something white.

A pistol-shot off the island the plane halted. Buzzard stayed in the machine, Alan and Bill got out the canvas canoe, slipped automatically into their pockets, took rifles prominently in hand and went ashore.

While Bill searched the bandit for a hidden revolver, Alan looked at him curiously. He was a strange character to find in this country. Slant-eyed, his skin olive, he looked as though he had oriental blood in his veins. The rag he had waved in token of surrender was a sling. His right arm dangled limp at his side.

Alan demanded: "Are you the fellow we hit in that fight?"

"Chink" Woolley nodded.

"Are those other men out hunting?" Alan asked, "or where?"

Woolley batted his eyes slowly, as though taking thought. "Huntin', yes," he managed.

"Which way?"

"North."

(To Be Continued.)

Keep fit!

Headaches, nervousness, depression—banish them all by keeping your system clean! Take ENOS every morning.

ENOS FRUIT SALT

second time, Alan drew the island up to him studying the tent sharply, he saw a movement of the flap-front and distinguished a man's face, upturned, peering at them.

One bandit there at least! But the others? . . .

A guess shot into his mind: those others had probably gone hunting for caribou over east at the fable.

As though that watcher there below realized what this ominous circling meant and had become panicky, a puff of white, a single puff, burst from the flap-front. Confident the man was alone and the others were gone, Alan decided to take this bandit alive. He needed information about the others, and information about that pack of furs to clear Dave MacMillan.

While Buzzard circled at a safe distance, he tore a page from a memo book and printed a message: "If you shoot again, we'll splatter you and that island into the lake with our machine guns. Stand out in the clear. No weapons on you. Don't try any crooked move after we light."

He wrapped the message around a monkey-wrench and handed it to Buzzard. From wartime practice of dropping "eggs" on ammunition dumps and second-trench Flammenwerfer and camouflaged batteries of Krupp 79's east of Verdun, with no aerial sights except two nails and a string along the fuselage, Buzzard was a good judge of speed, altitude and the right split-instant to release. Whirling over the island, a few hundred yards up, he planted the missile with a dozen paces of the flap-front.

As they looked back they saw the man run out to it, read the message, hesitate a moment, and then raise his left arm, waving something white.

A pistol-shot off the island the plane halted. Buzzard stayed in the machine, Alan and Bill got out the canvas canoe, slipped automatically into their pockets, took rifles prominently in hand and went ashore.

While Bill searched the bandit for a hidden revolver, Alan looked at him curiously. He was a strange character to find in this country. Slant-eyed, his skin olive, he looked as though he had oriental blood in his veins. The rag he had waved in token of surrender was a sling. His right arm dangled limp at his side.

Alan demanded: "Are you the fellow we hit in that fight?"

"Chink" Woolley nodded.

"Are those other men out hunting?" Alan asked, "or where?"

Woolley batted his eyes slowly, as though taking thought. "Huntin', yes," he managed.

"Which way?"

"North."

Retired Fuzzies Judge Makes Jig-Saw Puzzles In Workshop

One of the reasons Mr. Justice Frank B. Gregory, of Victoria, decried to retire from the bench, he said, was that he wanted to make jig-saw puzzles. His retirement became effective a few days ago, and since then he has been spending many hours a day at his workshop making puzzles.

Making jig-saws is nothing new for the former jurist, however. He used to make them many years ago for children who are now grown men and women.

"It has been my hobby ever since I was a kid," said Mr. Justice Gregory. "To my mind there's nothing more fascinating, unless it be the consideration of a particularly complicated piece of litigation. However, I have had enough of law. I'll be content now if I am able to make jig-saws."

May Have New Industry

Mucilage Likely To Be Made From Manitoba Black Poplar

Making of mucilage from black poplars may be the next development of Manitoba's natural resources.

The Balm of Gilead tree, widespread in Manitoba, contains large quantities of gum which can serve as a basis for adhesive. The forest committee of the industrial development board has been authorized to carry out tests on using the product commercially.

A little vinegar sprinkled in your white sink and left for a few minutes before being washed off will remove rust stains.

A foreign concern establishing a chain of stores in China expects to sell 1,000,000 pairs of shoes a year.

World War's Last Battle

Present Conditions So Described By Dr. J. E. Shotwell

The depression is "the last battle of the World War," Dr. James T. Shotwell says in his annual report as director of the division of economics and history of the Carnegie Endowment for International Peace now made public.

Dr. Shotwell holds that because the war is the fundamental cause of the depression, the remedies must be political as well as economic. He believes that the only solid guarantee of prosperity lies in strengthening instruments of international policy which are the substitutes of war, such as arbitration, the World Court and the League of Nations.

This underlying cause of the depression—the war—has been neglected in much of the present discussion of the present crisis, Dr. Shotwell says. "Those who are studying the depression in order to find a way out have failed to think through to the basic economic effects of the war," he writes. "Even such leaders as Sir Arthur Salter and those responsible for the program of the World Economic Conference have dealt with the war primarily in terms of history. Consequently the discussions have been chiefly concerned with what are in reality fatalities of the post-war period."

Dr. Shotwell lists as one of the great fallacies of the war's aftermath the belief in the "invisible march of progress." "The world forgot that the consumption market, though temporarily enlarged by the exhaustion of supplies, was fundamentally lessened by the war and its consequences," he says. "The idea began to be advanced that the day of accounting could be indefinitely postponed by increased production and refinanced indefinitely against still more distant ventures."

Slaughter Of Wild Life

Man's Love Of Sport and Woman's Vanity Are Blamed

Dr. A. H. B. Kirkman, secretary for wild life, University of London Animal Welfare Society, speaking at a meeting recently, entered a protest against cruelty to animals and birds. Vain women, ignorant gamekeepers, egg collectors and certain unjustifiable medical purposes were to blame, he said, for cruelty to countless numbers of animals and birds.

At least 100,000,000 birds perishing in the different markets of the world, excluding moles, rabbits and muskrats, in 1928, and 3,500,000 skins were exported from Australia alone. "The vanity of women," he said, "is partly responsible for the slaughter of birds in connection with the persecution of animals and birds generally. I think the sporting instincts, as they call them, of men are as much at fault. In Sumatra families of the orang-utans are being caught by natives and sent to clove countries to be used for certain medical purposes which are absolutely unjustifiable. They are a dying race of animals for the most part."

Age Of Technocracy

Machine Power Shown To Be Much Cheaper Than Man Power

The Montreal aldermanic relief committee has set out to determine just what are the differences between man-power and machine-power in labor, and here are some of the results:

1. One mechanical truck loader and operator equals 52 men.

2. Loader fills a truck in five minutes; the gang requires from 40 to 60 minutes.

3. Cost per truck: Loader, 60 cents; gang, \$20.40.

4. Cost per truck: Loader, 12 cents; gang, between \$2 and \$4.

These preliminary data will be checked in a more extended experiment on a pipe-laying job next. The test grew out of the demand that labor-saving machines be done away with and unemployed laborers substituted.

The "Sliding Roof" Hat

The "sliding roof" hat is the latest in Liverpool, England. It has been invented by R. Nill of that city, and feels like any other soft hat, but it has two crowns the ordinary crown made to slip off, disclosing an under-crown of the same material, but perforated with numerous small holes. It will be popular on warm days, says the inventor.

After nearly two months' work creosote thrown over the Runnymede, England, memorial pillars on the eve of their unveiling by the Prince of Wales, has been removed.

In a single day, scientists find that a swallow eats 500 to 600 flies.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick or hurt. But Minard's Liniment makes it easy to care for a sick cow. Mr. H. M. Thos. Baines of Lardo, B.C., found one of her herd with a lump in her udder. "I rubbed it with Minard's Liniment," she says, "and it soon got better."

Minard's is best for Cuts, Bruises, Cuts, Diapering, etc., and equally good in stable or in house. Well named "King of Pains."

High Above the Clouds

Test Balloons Sent Up From Airport At Calgary

Canada's knowledge of conditions in the stratosphere high above the clouds has been enriched by recovery of nine of 16 meteorological balloons released at the Calgary airport since last August.

Announcement of the recovery of the balloons was made by Lieut.-Commander C. H. Bromley, representative of the Dominion meteorological service at Calgary, who released two of the balloons each month. The tests, in conjunction with other work being carried on as Canada's share in the international polar year investigations, will be continued until the close of the polar year in August of this year.

Nine miles above the earth—a mile short of the height reached by Professor Auguste Piccard in his balloon ascent to investigate the stratosphere—probably moved by some of the balloons released here reached. Some expanded and burst when only three miles high, but the average altitude reached was 40,000 feet—almost eight miles.

Appointed a Deputy

King George Got Out Of A Difficulty Created Long Ago

In connection with the annual Easter vestry meetings it is recalled that about 150 years ago the King was elected church warden. It was George III. who was given this distinction by the famous London church, St. Martin-in-the-Fields, but his majesty did not take it as a compliment and refused to serve.

Buckingham Palace being in the parish church members at a vestry meeting, probably moved by some of the balloons released here reached. Some expanded and burst when only three miles high, but the average altitude reached was 40,000 feet—almost eight miles.

THE RHYMING OPTIMIST

YOU HAVE COME BACK

You have come back; the garden ways are bright as in those other days When violet perfume was in the air And magnolias And larkspur flowered to win your praise.

You have come back; the old house Again as gracious as a rose. Through every room Like rain perfume. The magic of your presence flows.

You have come back, and O, my dear, The wonder of your being here Brings back again Old dreams we knew And love we lost in yesterday!

Cause Of Suicides

Bottom Of A Large Percentage

A study of suicides in the United States as disclosed in cold insurance company statistics led Dr. William Muhlbarg to conclude that masculine vanity was at the bottom of a large percentage of these tragedies in the last three years.

"The thing that drives men to take their own lives, it seems," he said, "is their inability to swallow the pride they have enjoyed building during their prosperous years. It is not the haunting fear of seeing his children go hungry, or his wife weaken under the monotony of housework, so much as it is the agony of visualizing his neighbor's glee when his 12-cylinder super-sedan is sold, and the family withdraws from the country club."

Wet Days Are Holidays

The only donkey on the establishment of the British army is Billy, a grey jackass stationed at Gibraltar. His job is to carry wet clothes from the military laundry to the drying ground and bring them back when they are dry.

Every wet day is a holiday for Billy.

There are many metals lighter than aluminum. The lightest of all, lithium, will float on water like a cork.

The strength of the British army is 5,000 below establishment, but 3,000 higher than a year ago.

Glasgow has a public graft scandal.

Contentment Without Riches

Man Found Peace In Life After Fortune Was Gone

In Newton, Iowa, is a man, Frank F. Falor, 74, who has lived three lives.

At 27 he was known as the richest cattle and purchased swine breeder in the middle west. He wore a silk topper, drove fast horses, and to outdo his neighbors beyond possible doubt, hired negro servants to wait on him. That was Life No. 1.

Shortly his success faded. He became penniless, and turned reclusive, a man disgruntled with life, gloomy and soured with mankind. That was Life No. 2.

He became interested in religion and began to practise it conscientiously. His interests broadened and he started growing flowers about his little shack. He had started Life No. 3.

Today, tucked away among the gleaming, glass roofs of greenhouses at the outskirts of Newton is the same shack. It has been so built over and around with flower houses and other buildings devoted to floriculture and gardening that few people realize its presence.

Falor still lives in the shack, although his life is worth more now, measured by the financial yardstick, than he ever was in Life No. 1.

Falor said he had learned that success and failure, after all, were relative matters, but that peace of mind and happiness were important fragments of life which every person owed to himself.

Little Helps For This Week

"This God is our God forever and ever; He will be our guide even unto death."—Psalms 48:14.

Be still my soul; thy God doth undertake To guide the future as He has the past; Thy hope, thy confidence let nothing shake, All now mysterious shall be bright at last.—J. B. Burleigh.

He has kept and folded us from ten thousand ills when we did not know it. In the midst of our security we should have perished every hour but that He sheltered us "from the terror by night and the arrow that flieth by day"—from the powers of evil that walk in darkness, from snares of our own evil will. He has saved us from our own undoing. Let us read the traces of His hand in all our ways. In all the events, the changes and chances of this troubled state. It is He that feeds and feeds us, that makes us to go in and out—to be faint or find pasture, to lie down by the still waters, or to walk by the way that is parched and desert.—H. E. Mannix.

Reciprocal Trade Agreement

Tariff Concessions Between Great Britain and Germany Over Limited Field

Reciprocal trade and tariff concessions between Germany and Great Britain were announced recently. The quota for British coal exports to Germany has been nearly doubled and in return the United Kingdom makes tariff concessions over a limited field.

The announcement of arrangements of increased trade with Germany follows upon an earlier statement declaring a new trade agreement with Denmark by which Great Britain's market in Denmark for her industrial products will be greatly increased in return for increased quotas granted to Danish dairy and agricultural products.

To Make Stratosphere Flight

Professor Piccard Has Asked U.S. Balloonist To Make Trip

The Goodyear Zeppelin Corporation has announced that Lieutenant-Commander T. G. W. Settle, chief of the United States navy's inspection balloon Akron, and international balloon race champion, will make a stratosphere flight from Chicago this summer.

The announcement said the balloonist was asked to make the flight by Professor Auguste Piccard, famed Swiss stratosphere balloonist, following the latter's visit here last March.

The proposed flight may be made sometime between July 1 and 20.

Friendship Tours Organized

"Friendship Tours," organized overseas, will bring parties of British women to Canada and the United States to attend the International Congress of Women and the World's Fair at Chicago in July, according to word received at the Canadian National Railways Passenger Department, Montreal.

The plan indicates that about 200 British women will join the tours.

Russian Newspapers

In Russia in 1913 there were 859 papers with a total circulation of 2,500,000. In 1914, at the beginning of 1913, the latest figures available there were 5,600 papers with a total circulation of 88,000,000, and papers are printed in eighty-four languages.

It is all right to kiss the bride, if one does not wait too long after the ceremony.

Supports Schoolboy's Verdict

London Professor Has For Opinion Of Old Roman

Schoolboys of many generations have been inclined to vote Caesar as a bore at the very best. Poor as is their opinion it is almost complimentary compared with that of Professor R. S. Conway, as given before the conference of the Classical Association in London, England.

"Julius Caesar is commonly spoken of as the founder of the Roman Empire," said the professor. "The truth is that he did nothing to create a stable government beyond insisting that provincial governorships should be held by men whom he appointed himself. Many of these were chosen from the ranks of foot-pads and cut-throats, whom, as he said himself, he was glad to honor because they had supported him."

"No one can deny that Caesar was a man of splendid daring, and that he could on occasion show, especially to his inferiors, a quality charming courtesy. But from many passages in the 'Gallic War' and from his own surviving letters it is plain that he was entirely wanting in humor and that his whole nature was soaked in self-esteem."

"Under the influence of Cleopatra, who was present in Rome in 46 and 44 B.C., this temper took shape in acts of senile vanity and gratuitous insults to the time-honored traditions of ordered civil life. This led inevitably to his assassination and the appalling civil wars of the next 13 years."

Curse Of High Tariffs

World Has Been Going Crazy Over Raising Trade Barriers

Tariffs throughout the world must come down, Hon. R. J. Macdonald, Minister of Railways and Canals, said in the House of Commons recently. Action, however, must be taken on a world-wide scale and it would be suicide for Canada, or any other single country to lower its tariffs while high duties are maintained by the rest of the world.

"I believe there is such a thing as going crazy over tariffs," said the minister, "and I think that is what the world has done."

Dr. Manion made his tariff comment by way of an aside as he was piloting amendments to the railway bill through the House. E. J. Young, veteran free trade Liberal from Weyburn, Sask., had just ascribed low railway earnings to trade barriers and the minister agreed the reopening of channels of trade now closed would give the railway business a better chance.

Useful Information

Good Baking Depends On Right Temperature Of Oven

Crisp cookies should be baked in a hot oven. Molasses cookies, which burn easily, require a cool oven of not more than 350 degrees. Baking powder biscuits should be put into a moderate oven and the heat should not be increased until they are almost done. Pastry requires a hot oven and thorough baking to make it flaky and digestible. Reduce the heat of the oven when the pastry itself is cooked and you are ready to bake the filling. All egg mixtures, custards, souffles and puddings should be baked with the oven at a low temperature. If the heat rises above 350 degrees you will not have good luck with any connection containing eggs.

Not So Ignorant

Small Boy—"I don't think the gentleman next door knows much about music."

Mother—"Why?"

Small Boy—"Well, he told me this morning to cut my drum open and see what was inside it."

By adding artificial dyes to their food, chickens with beautifully colored plumage are being reared in England.

Rheumatism

Is caused by failure of kidneys to remove uric acid poisons from the blood. Gin Pills relieve by neutralizing this acid and restoring the kidneys to normal action—50c a box at all druggists.

GIN PILLS FOR THE KIDNEYS

It is all right to kiss the bride, if one does not wait too long after the ceremony.

Glasgow has a public graft scandal.

There are many metals lighter than aluminum. The lightest of all, lithium, will float on water like a cork.

The strength of the British army is 5,000 below establishment, but 3,000 higher than a year ago.

Round-Up Sale of Shoes!

FOR WOMEN, MEN, BOYS AND CHILDREN

Sale Starts **SATURDAY, MAY 27, at 9 a. m.**, and Continues for 10 Days
AN UNUSUALLY ADVANTAGEOUS occasion to buy Shoes that are to be relied on for Wear and Comfort. Sale Prices on all our regular stock; also Special Clearance of Broken Lines—marked down to speed them out.

CAR POLISHING

Get your car polished the new Electrical way. One polishing will last a whole season. This new method restores the original brilliancy to the paint on your car and makes it look like new. For a period of two weeks I am doing this work at a greatly reduced price, so get your car polished soon. Pete Swanson.
